In the 1880s, social reform leaders warned that the "unworthy" poor were taking charitable relief intended for the truly deserving. Armed with statistics and confused notions of evolution, these "scientific charity" reformers founded organizations intent on limiting access to relief by the most morally, biologically, and economically unfit. Brent Ruswick examines a prominent national organization for scientific social reform and poor relief in Indianapolis in order to understand how these new

The Great Irish Famine was one of the most devastating humanitarian disasters of the nineteenth century. In a period of only five years, Ireland lost approximately 25% of its population through a combination of death and emigration. How could such a tragedy have occurred at the heart of the vast, and resource-rich, British Empire? Charity and the Great Hunger in Ireland explores this question by focusing on a particular, and lesser-known, aspect of the Famine: that being the extent to which people throughout the world mobilized to provide money, food and clothing to assist the starving Irish. This book

considers how, helped by developments in transport and communications, newspapers throughout the world reported on the suffering in Ireland, prompting funds to be raised globally on an unprecedented scale. Donations came from as far away as Australia, China, India and South America and contributors emerged from across the various religious, ethnic, social and gender divides. Charity and the Great Hunger in Ireland traces the story of this international aid effort and uses it to reveal previously unconsidered elements in the history of the Famine in Ireland.

Century "Mike Martin has written a clear and wide-ranging book on ethical issues related to philanthropy that is rich in concrete examples." -- Ethics Writing for the general reader, Mike Martin explores the philosophic basis of philanthropy -- "virtuous giving." This book will be welcome reading for anyone who has pondered what caring and giving mean for a good society.

Robert G. Gregory challenges the apparent assumption that non-Western peoples lack a significant indigenous philanthropic culture. Focusing on the large South Asian community in East Africa, he relates how, over a century, they built a philanthropic culture of great magnitude, and how it finally collapsed under the ascendancy of

increasing state regulation and policies directed against non-African communities. Compelled by poverty to seek better opportunities overseas, most Asians arrived in East Africa as peasant farmers. Denied access to productive land and sensing economic opportunity, they turned to business. Despite severe forms of racial discrimination in the colonial society, they suffered few restrictions on their business enterprises and some became very wealthy. Gregory's historical analysis shows philanthropy as an important contribution, one that stemmed from deep roots in Hindu, Muslim, and Buddhist culture. The sense of nonracial social responsibility cultivated social, medical, and educational

facilities designed for all. This age of philanthropy terminated with the Asian exodus. The socialist and racial policies adopted by East African governments over the past few decades have virtually destroyed the foundation necessary for philanthropy as well as the distinct Asian cultural identity. Gregory's account of the East Asian's role in philanthropy deserves great attention and sober reflection.

This book is almost certain to anger the individuals it studies. Odendahl interviewed over 140 wealthy American philanthropists regarding their charitable activities, and through interpretative analysis, she suggests that the rich support upper-class charitable

interests, such as private colleges, while basic human services are neglected. Despite politicians' rhetoric, the private sector is unlikely to compensate for cutbacks in government social programs, she concludes.

Reasonable objections can be made to some of Odendahl's interpretations, especially those that stray into psychoanalysis (is guilt reduction really a motive toward philanthropy?), but her argument is so passionate that it merits discussion. Both public and academic libraries will want this.--From Library Journal.

This book challenges scholarship which presents charity and voluntary activity during World War I as marking a downturn from the high point of the late Victorian period.

Charitable donations rose to an all-time peak, and the scope and nature of charitable work shifted decisively. Far more working class activists, especially women, became involved, although there were significant differences between the suburban south and industrial north of England and Scotland. The book also corrects the idea that charitably-minded civilians' efforts alienated the men at the front, in contrast to the degree of negativity that surrounds much previous work on voluntary action in this period. Far from there being an unbridgeable gap in understanding or empathy between soldiers and civilians, the links were strong, and charitable contributions were enormously important in

maintaining troop morale. This bond significantly contributed to the development and maintenance of social capital in Britain, which, in turn, strongly supported the war effort. This work draws on previously unused primary sources, notably those regarding the developing role of the UK's Director General of Voluntary Organizations and the regulatory legislation of the period.

Decolonizing Wealth is a provocative analysis of the dysfunctional colonial dynamics at play in philanthropy and finance. Award-winning philanthropy executive Edgar Villanueva draws from

the traditions from the Native way to prescribe the medicine for restoring balance and healing our divides. Though it seems counterintuitive, the philanthropic industry has evolved to mirror colonial structures and reproduces hierarchy, ultimately doing more harm than good. After 14 years in philanthropy, Edgar Villanueva has seen past the field's glamorous, altruistic façade, and into its shadows: the old boy networks, the savior complexes, and the internalized oppression among the "house slaves," and those select few people of color who gain access. All these funders reflect and perpetuate the same underlying dynamics that divide

Us from Them and the haves from have-nots. In equal measure, he denounces the reproduction of systems of oppression while also advocating for an orientation towards justice to open the floodgates for a rising tide that lifts all boats. In the third and final section, Villanueva offers radical provocations to funders and outlines his Seven Steps for Healing. With great compassion—because the Native way is to bring the oppressor into the circle of healing—Villanueva is able to both diagnose the fatal flaws in philanthropy and provide thoughtful solutions to these systemic imbalances. Philanthropy in America is a giant undertaking—every year more than \$390 billion is voluntarily given by individuals, foundations, and businesses to a riot of good causes. Donation rates are two to ten times higher in the U.S. than in comparable nations, and privately funded efforts to solve social problems, enrich culture, and strengthen society are among the most significant undertakings in the United States. The Almanac of American Philanthropy was created to serve as the definitive reference on America's distinctive philanthropy. Upon its publication it

world. In this groundbreaking exploration of historical and contemporary philanthropy, bestselling author Paul Valley reveals how this far-reaching change came about. Vivid with anecdote and scholarly insight, this magisterial survey – from the ancient Greeks to today's high-tech geeks – provides an original take on the history of philanthropy. It shows how giving has, variously, been a matter of honour, altruism, religious injunction, political control, moral activism, enlightened self-interest, public good, personal fulfilment and plutocratic manipulation. Its narrative moves from the Greek man of honour and Roman

patron, via the Jewish prophet and Christian scholastic – through the Elizabethan machiavel, Puritan proto-capitalist, Enlightenment activist and Victorian moralist – to the robber-baron philanthropist, the welfare socialist, the celebrity activist and today's wealthy mega-giver. In the process it discovers that philanthropy lost an essential element as it entered the modern era. The book then embarks on a journey to determine where today's philanthropists come closest to recovering that missing dimension. Philanthropy explores the successes and failures of philanthrocapitalism, examines its claims and contradictions, and asks

In extended conversations they explore the relationship between philanthropy and family, faith, society, art, politics, and the creation and distribution of wealth. Highly engaging and meticulously researched, Paul Valley's authoritative account of philanthropy then and now critiques the

Just Giving investigates the ethical and political dimensions of philanthropy and considers how giving might better support democratic values and promote justice.

This book illuminates the philanthropic impulse that has influenced women's education and its place in the broader history of philanthropy in America. Contributing to the history of women, education, and philanthropy, the book shows how voluntary activity and home-grown educational enterprise were as important as big donors in the development of philanthropy. The essays in *Women and Philanthropy in Education* are generally concerned with local rather than

national effects of philanthropy, and the giving of time rather than monetary support. Many of the essays focus on the individual lives of female philanthropists (Olivia Sage, Martha Berry) and teachers (Tsuda Umeko, Catharine Beecher), offering personal portraits of philanthropy in the 19th and 20th centuries. These stories provide evidence of the key role played by women in the development of philanthropy and its importance to the education of women. *Philanthropic and Nonprofit Studies* -- Dwight F. Charity and Condescension explores how condescension, a

traditional English virtue, went sour in the nineteenth century, and considers the ways in which the failure of condescension influenced Victorian efforts to reform philanthropy and to construct new narrative models of social conciliation. In the literary work of authors like Dickens, Eliot, and Tennyson, and in the writing of reformers like Octavia Hill and Samuel Barnett, condescension—once a sign of the power and value of charity—became an emblem of charity ' s limitations. *Charity and Condescension* argues that, despite its reputation for idealistic self-assurance, Victorian charity frequently doubted its own operations and was driven by creative self-critique. Through sophisticated and original close readings of important Victorian texts, Siegel shows how these important ideas

developed even as England struggled to deal with its growing underclass and an expanding notion of the state ' s responsibility to its poor.

"According to Greek mythology mankind's first benefactor was the Titan, Prometheus, who gave fire, previously the exclusive possession of the gods, to mortal man." With these words the esteemed scholar Robert Bremner presents the first full-fledged history of attitudes toward charity and philanthropy. 'Giving' is a perfect complement to his earlier work *The Discovery of Poverty in the United States*. The word 'philanthropy' has been translated in a variety of ways: as a loving human disposition, loving kindness, love of mankind, charity, fostering mortal man, championing mankind, and helping people.

Download File PDF 1 2 Charity Philanthropy And Civility In American History

Bremner's book covers all of these meanings in rich detail. Bremner describes the ancient world and classical attitudes toward giving and begging; Middle Ages and early modern times, emphasizing hospitals and patients and donors and attributes of charity; the eighteenth century and the age of benevolence; the nineteenth century and the growth of the concept of public relief and social policy; and a careful multiple chapter review of the twentieth century. Bremner reviews the act of giving in such comparative contexts as London, England and Kasrilevke, Russia with such figures as Thomas Carlyle, Charles Dickens, and Sholem Aleichem, as well as the more familiar wealthy industrialist/philanthropists, forming part of the narrative. The final chapters bring the

story up to date, discussing the relationships of modern philanthropy and organized charity, and the uses of philanthropy in education and the arts. Bremner has an astonishing knowledge of the cultural context and the economic contents of philanthropy. As a result, this volume is intriguing as well as important history, written with lively style and wit. Whether the reader is a professional in the so-called "third stream" or "independent sector," or simply a citizen wondering just what the act of giving and the spirit of receiving is all about, 'Giving' will be compelling reading.

The philanthropic impulse to engage in charitable work and to encourage economic "improvement" was sharpened in eighteenth-century Ireland as Irish Protestants became

increasingly aware of the threat that social problems, such as poverty, disease and criminality, posed to their rule. One response to this threat was the establishment of a number of voluntary societies which sought to address the different problems plaguing Ireland. This book examines a number of these voluntary societies, including those concerned with promoting education, supporting hospitals, and improving agriculture and manufacturing. It shows how these movements differed from earlier efforts in organisation, method and aims and demonstrates the connection between religiously motivated charities, Enlightenment-inspired scientific societies and the Irish government. It pays particular attention to the role of women, both as supporters of, and objects of, charity. It

argues that, together, these movements aspired to purge Ireland of what they saw as destabilising factors that weakened the Anglo-Irish state. Improvers reflected Enlightenment-era optimism about the perfectibility of society and saw themselves as serving the interests and aspirations of the nation.
