What do Henry Ford, Thomas Edison, Mae West, Howard Hughes, John Madden, the Partridge Family, Ken Kesey, The Who, and Barbie have in common? Each had a home on wheels-be it an old converted school bus, a massive RV cruiser, or elegant house car. These celebrity motorhomes are only the frosting on the cake in Douglas Keister's entertaining and informative new book Mobile Mansions.

The book focuses on the effects of shock waves on vacancies and their clusters in fcc crystals. It is shown that high-speed cooperative atomic displacements represent a powerful tool for the purposeful modification of defect structures in crystalline bodies. The results are important for radiation material science, nano-engineering, the study of shock wave effects and the ultrasonic treatment of materials. Keywords: Computer Modelling of Nanopores, Molecular Dynamics, Fcc Metals, Defect Structures in Crystals, Radiation Material Science, Nano-Engineering of Materials, Ultrasonic Treatment of Materials, Radiation Induced Defects, Vacancy Clusters, Shock Wave Effects, Radiation-Resistant Materials, Thermomechanical Processing, Energy Transfer Mechanism, Nanopore Nucleation, Nanopore Based Filters, Nanopore Based Detectors, Cooling Elements in Nano-Electronics.

The primary purpose of the Manual of Classification of Motor Vehicle Traffic Accidents is to promote uniformity and comparability of motor vehicle traffic accident statistics now being developed in Federal, state and local jurisdictions. This manual is divided into two sections, one containing definitions and one containing classification instructions.

Descriptions of the cylinder-charge control, fuel injection, ignition and catalytic emission-control systems provides comprehensive overview of today's gasoline engines. This book also describes emission-control systems and explains the diagnostic systems. The publication provides information on engine-management-systems and emission-control regulations.

Revealing a world beyond the stereotype, My Cool Campervan celebrates the new wave of interest in modern-retro campervans. When people think of campervans, they almost always recall the iconic VW T2, that familiar, happy-faced van that embodies the virtues of enjoying the journey and taking your time. However, there is a world of forgotten campervans out there and an idiosyncratic world of individual conversions to campers. Join Jane Field-Lewis and Chris Haddon as they set off on a 3,500-mile trip to locate campervans and their proud owners, who share their memories of family holidays and long road trips. Delve into the world of road-tripping as they reveal a succession of delightful campervans, memorable locations, and classic models, at times beautifully restored, and at others well-loved and well-used. My Cool Campervan reveals a world beyond the stereotype and is a celebration of campervans' evolving styles and designs. We spend most of our lives skating across surfaces, seldom stopping to think about the underpinnings and background stories that brought us to the current moment and place. Jane Sasser's What's Underneath explores the ways in which we are grounded by memory and the physical world, our own beginnings and heritage. Whether remembering a childhood on a farm or reflecting on the present time, the poems consider how we are haunted by experiences we cannot change. The collection ends facing the future with an homage to beloved dogs, the steady devotion that waits for us at the end of each day, enriching our lives and growing new roots.

As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz -- rich cars, poor quality. There's only one Saturn you should buy. Toyota -- enough apologies: "when you mess up, 'fess up."
