The next frontier for wireless LANs is 802.11ac, a standard that increases throughput beyond one gigabit per second. This concise guide provides in-depth information to help you plan for 802.11ac, with technical

details on design, network operations, deployment, and monitoring. Author Matthew Gast—an industry expert who led the development of 802.11-2012 and security task groups at the Wi-Fi Alliance—explains how 802.11ac will not only increase the speed of your network, but its capacity as well. Whether you need to serve more clients with your current level of throughput, or serve your existing client

load with higher throughput, 802.11ac is the solution. This book gets you started. Understand how the 802.11ac protocol works to improve the speed and capacity of a wireless LAN Explore how beamforming increases speed capacity by improving link margin, and lays the foundation for multi-user MIMO Learn how multi-user MIMO increases capacity by enabling an AP to send data to multiple clients simultaneously

The Cisco CCNA is one of the most widely recognised and respected qualifications in the IT

industry. Every year, tens of thousands of people embark towards taking the exam via private study, Cisco Academy courses, or online training. The sad truth is most students quit along the way, and for those few who actually do attempt it, only 50% pass. All that time, effort, and money wasted! If there are so many manuals, CBT courses, lab simulators, exam engines, and study resources out there, then what goes wrong?

**This is the question
Cisco trainer Paul**

**Browning wanted to get
to the bottom of. After
interviewing thousands
of students, he
discovered that most
people quit because they
are simply overwhelmed
with the sheer volume of
material they need to
digest and, of course,
the large number of
hands-on skills they
need to be able to
demonstrate in the exam.
Add to that the day-to-
day stresses of
commuting to work,**

bringing up a family,
and the distraction of
everyday problems and
challenges; it's no
wonder people quit. This
is where Cisco CCNA in
60 Days can help. Devised
by two industry experts
and countless Cisco
students just like you,
the 60-day programme
breaks down every exam
requirement into a daily
study task. All you need
to do is open the book
at the relevant day
(from 1 to 60), read the
theory, and complete the
lab. Every lesson is

reviewed several times
in the form of exam
questions, review
sessions, a handy exam
cram guide, and, of
course, hands-on labs
for you to follow. You
can choose to take the
CCENT after the first 30
days and the ICND2 after
the next 30 days, or you
can take the CCNA after
60 days of study. Here

Paul Browning is a
former police officer
who used his CCNA
qualification to help
him make a career change
to IT. He worked for
Cisco in the UK for a
while, and then went on
to start his own Cisco
training company, which

he ran for 8 years before moving into online Cisco training. He is the author of several Cisco study guides. He has also created the online Cisco certification training sites, including www.howtonetwork.net and www.in60days.com. Technical author Farai Tafa used to work in a shoe shop but decided he wanted more out of life, so he began to study for his Cisco exams. He is now a dual CCIE and one of the leading Cisco

consultants in the US. He currently designs, installs, and troubleshoots networks for large companies. Author Daniel Gheorghe is a CCIE in Routing and Switching. He is currently preparing for his second CCIE certification (in Security) and he is developing his skills in system penetration testing. He also holds numerous certifications in networking and security, from Cisco and other vendors, including

CCNA, CCDA, CCNA Security, CCNP, CCDP, CCIP, FCNSA, FCNSP, and CEH. He took an interest in IT at an early age and soon developed a passion for computer networking, which made him study hard in order to reach an expert level. Technical author Dario Barinic is a network expert (dual CCIE #25071 - Routing and Switching, and Service Provider) with a Master of Engineering degree and eight years of experience in the

networking field. He also holds other certifications, such as Cisco CCNA and CCNP, HP AIS, ASE, MASE, and various Cisco specialisations. Dario is specialised in the area of routing and switching (designing, implementing, troubleshooting, and operating service provider and large enterprise WAN and LAN networks).
