The book comprises country reports of the 10 new EU Member States. Each country report provides essential definitional information regarding the various forms of sexual exploitation of children and types of missing children, outlines the way data collection on sexual exploited and missing children by various governmental (police, judicial, other) and nongovernmental actors is organised, and delivers available data on the phenomena concerned. A final, comparative report bridges the country report information into a first epidemiological state of the art for the 10 new Member States and

for the entire enlarged EU, comparing the newly gathered information with information collected in the initial 15 Member States during a previous study, the report of which has been published in January 2004 as the first book in the Childscope series.

From cleaning to construction, from agriculture to domestic work, every day migrant labourers are exploited and enslaved. Extra hours are squeezed out of Polish food packers, and trafficked African children are used for forced labour. Low wages are used to drive down prices from the oil industry to airport services. In this book, Toby Shelley shows that current unprecedented flows of migrant workers are a

direct result of economic liberalization. The appalling conditions and legal abuses which confront these workers are not a premodern aberration, but an integral part of the global economy. Shelley argues that even governments, keen to protect big business, are complicit in this exploitation; their 'law and order' approach on immigration being part of this complicity. Based on interviews and investigations with workers, unionists and activists, Exploited is a powerful and shocking read. A deeply-reported examination of why "doing what you love" is a recipe for exploitation, creating a new tyranny of work in which we cheerily acquiesce to doing jobs that take over our lives. You're told that if you "do what you love, you'll never work a day in your life."

Whether it's working for "exposure" and "experience," or enduring poor treatment in the name of "being part of the family," all employees are pushed to make sacrifices for the privilege of being able to do what we love. In *Work Won't Love You Back*, Sarah Jaffe, a preeminent voice on labor, inequality, and social movements, examines this "labor of love" myth -- the idea that certain work is not

really work, and therefore should be done out of passion instead of pay. Told through the lives and experiences of workers in various industries -- from the unpaid intern, to the overworked teacher, to the nonprofit worker and even the professional athlete -- Jaffe reveals how all of us have been tricked into buying into a new tyranny of work. As Jaffe argues, understanding the trap of the labor of love will empower us to work less and demand what our work is worth. And once freed from those binds, we can finally figure out what actually gives us joy, pleasure, and satisfaction. Besides poverty, sociocultural factors play a profound role in

aggravating the problem of child labour. This study established the fact that sociocultural factors have a decisive part to play in perpetuation of child labour. While highlighting such a relationship, the present report calls for tackling this pernicious problem through a concerted drive aimed at awareness generation, public education, adult literacy etc. A study of biodiversity governance analyzes the factors that determine the effectiveness of transnational advocacy networks and the importance of justice claims to conservation.

This volume explores the difficult conceptual and public policy issues involved in child labour. The contributors demonstrate the sheer prevalence of the commercial exploitation of child labour, its existence in both industrial and developing countries, and its rapid growth today under the twin pressures of mass poverty and the drive for cheaper production.
