After Confucius is a collection of eight studies of Chinese philosophy from the time of Confucius to the formation of the empire in the second and third centuries B.C.E. As detailed in a masterful introduction, each essay serves as a concrete example of “thick description”—an approach invented by philosopher Gilbert Ryle—which aims to reveal the logic that informs an observable

exchange among members of a community or society. To grasp the significance of such exchanges, it is necessary to investigate the networks of meaning on which they rely. Paul R. Goldin argues that the character of ancient Chinese philosophy can be appreciated only if we recognize the cultural codes underlying the circulation of ideas in that world. Thick description is the best preliminary method to determine how Chinese thinkers conceived of their own enterprise. Who were the ancient Chinese philosophers? What was their intended audience? What were they arguing about? How did they respond to earlier thinkers, and to each other? Why did those in power wish to hear from them, and what did they claim to offer in return for patronage? Goldin addresses these questions as he looks at several topics, including rhetorical conventions of Chinese philosophical literature; the value of recently excavated manuscripts for the interpretation of the more familiar, received literature; and the duty of translators to convey the world of concerns of the original texts. Each of the cases investigated in this wide-ranging volume exemplifies the central conviction behind Goldin's plea for thick description: We do not do justice to classical Chinese philosophy unless we engage squarely the complex and ancient

Archytas of Tarentum is one of the three most important philosophers in the Pythagorean tradition, a prominent mathematician, who gave the first solution to the famous problem of doubling the cube, an important music theorist, and the leader of a powerful Greek city-state. He is famous for sending a trireme to rescue Plato from the clutches of the tyrant of Syracuse Dionysius II, in 361 BC. This 2005 study was the first extensive enquiry into Archytas' work in any language. It contains original texts, English translations and a commentary for all the fragments of his writings and for all testimonia concerning his life and work. In addition there are introductory essays on Archytas' life and writings, his philosophy, and the question of authenticity. Carl A. Huffman presents an interpretation of Archytas' significance both for the Pythagorean tradition and also for fourth-century Greek thought, including the philosophies of Plato and Aristotle.

Dietary supplements are widely available through a rapidly expanding market of products commonly advertised as beneficial for health, performance enhancement, and disease prevention. Given the importance and frequent evaluation of physical performance and health as a criteria to join and remain in the military, the use of these products by military personnel has raised concern regarding over-all and long-term efficacy and safety. This evaluation is

especially difficult, as many of these supplements contain multiple ingredients, have a changing composition over time, or are used intermittently at doses difficult to measure. This book analyzes the patterns of dietary supplement use among military personnel, examines published reviews of the scientific evidence, and identifies those dietary supplements that are beneficial and/or warrant concern due to risks to health or performance. The book also recommends a system to monitor adverse health effects and a framework to identify the need for active management of dietary supplements by military personnel. Military policy makers, personnel, and recruits will find this book useful, as will nutritionists, athletes, and others working in strenuous environments.

Resistance and Persuasion is the first book to analyze the nature of resistance and demonstrate how it can be reduced, overcome, or used to promote persuasion. By examining resistance, and providing strategies for overcoming it, this new book generates insight into new facets of influence and persuasion. With contributions from the leaders in the field, this book presents original ideas and research that demonstrate how understanding resistance can improve persuasion, compliance, and social influence. Many of the authors present their research for the first time. Four faces of resistance are identified: reactance, distrust, scrutiny, and inertia. The concluding chapter summarizes the book's theoretical contributions and establishes a resistance-based research agenda for persuasion and attitude change. This new book helps to establish resistance as a legitimate sub-field of persuasion that is equal in force to influence. Resistance and Persuasion offers many new revelations about persuasion: *Acknowledging resistance helps to reduce it. *Raising reactance makes a strong message more persuasive. *Putting arguments into a narrative increases their influence. *Identifying

illegitimate sources of information strengthens the influence of legitimate sources. *Looking ahead reduces resistance to persuasive attempts. This volume will appeal to researchers and students from a variety of disciplines including social, cognitive, and health psychology, communication, marketing, political science, journalism, and education.

Olonkho , the epic narrative and song tradition of Siberia 's Sakha people, declined to the brink of extinction during the Soviet era. In 2005, UNESCO 's Masterpiece Proclamation sparked a resurgence of interest in olonkho by recognizing its important role in humanity 's oral and intangible heritage. Drawing on her ten years living in the Russian North, Robin P. Harris documents how the Sakha have used the Masterpiece program to revive olonkho and strengthen their cultural identity. Harris 's personal relationships with and primary research among Sakha people provide vivid insights into understanding olonkho and the attenuation, revitalization, transformation, and sustainability of the Sakha 's cultural reemergence.

Interdisciplinary in scope, Storytelling in Siberia considers the nature of folklore alongside ethnomusicology, anthropology, comparative literature, and cultural studies to shed light on how marginalized peoples are revitalizing their own intangible cultural heritage.

Ray Bradbury's novel *Fahrenheit 451* is an enduring masterwork of twentieth-century American literature—a chilling vision of a dystopian future built on the foundations of ignorance, censorship, and brutal repression. The origins and evolution of Bradbury's darkly magnificent tale are explored in *A Pleasure to Burn*, a collection of sixteen selected shorter works that prefigure the grand master's landmark novel. Classic, thematically interrelated stories alongside many crucial lesser-known ones—including, at the collection's heart, the novellas "Long After Midnight" and "The Fireman"—*A Pleasure to Burn* is an indispensable companion to the most powerful work of America's preeminent storyteller, a wondrous confirmation of the inimitable Bradbury's brilliance, magic . . . and fire.

Theodore Dreiser's *An American Tragedy* (1925) is a novel about the harsh realities of American life. Based on an actual murder case, the story concerns a young man, Clyde Griffiths, who is born into a religious family. Once upon a time I was falling apart. Now I'm always falling in love. Pick up the microphone. When Rob Sheffield moved to New York City in the summer of 2001, he was a young widower trying to start a new life in a new town. Behind, in the past, was his life as a happily married rock critic, with a wife he adored, and a massive collection of mix tapes that captured their life together. And then, in a flash, all he had left were the tapes. Beyoncé , Bowie, Bon Jovi, Benatar . . . One night, some friends dragged him to a karaoke bar in the West Village. A night out was a rare occasion for Rob back then. Turn around Somehow, that

night in a karaoke bar turned into many nights, in many karaoke bars. Karaoke became a way out, a way to escape the past, a way to be someone else if only for the span of a three-minute song. Discovering the sublime ridiculousness of karaoke, despite the fact that he couldn't carry a tune, he began to find his voice. Turn around And then the unexpected happened. A voice on the radio got Rob's attention. The voice came attached to a woman who was unlike anyone he'd ever met before. A woman who could name every constellation in the sky, and every Depeche Mode B side. A woman who could belt out a mean Bonnie Tyler. Bright Eyes Turn Around Bright Eyes is an emotional journey of hilarity and heartbreak with a karaoke soundtrack. It's a story about finding the courage to move on, clearing your throat, and letting it rip. It's a story about navigating your way through adult romance. And it's a story about how songs get tangled up in our deepest emotions, evoking memories of the past while inspiring hope for the future.

Known as the "Father of Festival Sound," Bill Hanley (b. 1937) made his indelible mark as a sound engineer at the 1969 Woodstock Music and Arts Fair. Hanley is credited with creating the sound of Woodstock, which literally made the massive festival possible. Stories of his on-the-fly solutions resonate as legend among festivalgoers, music lovers, and sound engineers. Since the 1950s his passion for audio has changed the way audiences listen to and technicians approach quality live concert sound. John Kane examines Hanley's echoing impact on the entire field of sound engineering, that crucial but often-overlooked carrier wave of contemporary music. Hanley's innovations founded the sound reinforcement industry and launched a new area of technology, rich with clarity and intelligibility. By the early seventies the post-Woodstock festival mass gathering movement collapsed. The music industry shifted, and new sound companies surfaced. After huge financial losses and facing stiff competition, Hanley lost his hold on a business he helped create. By studying both his history during the festivals and his independent business ventures, Kane seeks to present an honest portrayal of Hanley and his acumen and contributions. Since 2011, Kane conducted extensive research, including over one hundred interviews with music legends from the

production and performance side of the industry. These carefully selected respondents witnessed Hanley's expertise at various events and venues like Lyndon B. Johnson's second inauguration, the Newport Folk/Jazz Festivals, the Beatles' final tour of 1966, the Fillmore East, Madison Square Garden, and more. The Last Seat in the House will intrigue and inform anyone who cares about the modern music industry.

"I am particularly impressed with Bloomberg's insights about the ways in which women writers' urge to harness the power of women's myths has to some extent been aroused by historical forces. . . . She explains that women's desire to reinvent their identities requires that women writers take over the narrative tools (such as mythic allusions) provided them by male writers and use those tools to build their own textual 'house.'"--Mary Lowe-Evans, University of West Florida *Tracing Arachne's Web examines the use of myth in works by American women novelists of the late 19th and early 20th centuries, showing how both classical allusions and ethnic folk myth liberated these writers and enabled them to understand and experience their social and economic worlds. Using the metaphor of Demeter and Persephone as her framework, Kristin Mapel Bloomberg identifies a cycle in women's fiction that moves from the utopian world of Demeter's garden in the late 19th century to the experience of isolated women in the patriarchal underworld of literary modernism. Examining the works of Sarah Orne Jewett, Emma D. Kelley-Hawkins, Onoto Watanna (aka Winnifred Eaton), Alice Dunbar-Nelson, Edith Wharton, and Djuna Barnes, she develops a model of women's writing that ties these writers' fascination with the occult and Greek mythology to T. S. Eliot's notion of the "mythical method." Drawing from history and popular*

culture, she demonstrates how women of color responded to many of the same cultural currents as white writers. She does this, moreover, by analyzing the coded strategies followed by women of color to get their books into print, without collapsing race into gender issues. Invariably provocative, Bloomberg's writing creates a picture of female power in turn-of-the-century American fiction in which women writers turned to alternative spiritual ideologies and occult philosophies to investigate tensions between racism, sexism, and classicism. This book will appeal to scholars in American studies, literary criticism, women's studies, and cultural studies. Kristin M. Mapel Bloomberg, associate professor of English and women's studies at Hamline University in St. Paul, Minnesota, holds the Hamline University Chair in the Humanities and is also Director of the Women's Studies Program.
