Education and philosophy go hand-in-hand. Philosophers laid a foundation of educational theories, and set a stepping stone for the modern day education system and educational institutions. This book offers a comprehensive account of the fundamental theories presented by philosophers, and society's role in shaping them. The book begins by explaining theories such as idealism, naturalism, pragmatism, and then moves on to examine the philosophers themselves (Indian and Western) and their contributions to the world of education. The book then explains the contribution of society and community in the development of children. Chapters also explore the role of institutions such as schools, colleges and the home in inculcating values in a child. The concluding chapters examine the concepts of

secularism, democracy and national integration vis--vis education. Designed for the undergraduate and postgraduate students of education, the book will be equally beneficial for the teachers and educationists.

The field of educational psychology draws from a variety of diverse disciplines including human development across the life span, measurement and statistics, learning and motivation, and teaching. And within these different disciplines, many other fields are featured including psychology, anthropology, education, sociology, public health, school psychology, counseling, history, and philosophy. In fact, when taught at the college or university level, educational psychology is an ambitious course that undertakes the presentation of many different topics all tied together by the theme of how the individual can best function in an "educational" setting, loosely defined as anything from pre-school through adult education.

Educational psychology can be defined as the application of what we know about learning and motivation, development, and measurement and statistics to educational settings (both school- and community-based). This revised and expanded edition is a sequel to the first edition which was warmly received by the student and teaching community for its indepth analysis and refreshing approach to the subject.

It is a book that enables and empowers students to understand the value and essential importance of educational psychology to becoming a qualified and quality teacher. What instructors and students who have used "Essentials" say about the text: "I have had many students each term tell me that this is the most readable and practical textbook they have ever read. . . .["Essentials"] is something that [Ormrod] wrote after considering her students' needs! This comes out in the writing style but in a way that also maintains the rigor of the content and uses the most recent understandings in the field"Mark J. SzymanskiPacific University "This text creates an integrated and engaging narrative that adeptly weaves theories and concepts of learning, motivation, and development into classroom teaching. . . .Not only is the text a pleasure to read, but it is also a pleasure to teach using this text. . . .This format is sensitive to the length of semesters, and frees instructors from rushing from one chapter to the next or covering multiple chapters in a single week. As such, instructors have greater flexibility to explore the topics with students." Cecil RobinsonThe University of Alabama "Other texts present information that is often bogged down with dry descriptions of research and abstract concepts. Ormrod has an outstanding ability

to make content accessible to and interesting for undergraduate students. . . .Also, examples and suggestions are clearly related to chapter content and helpful for tying content to actual classroom practice. We recommend that students keep this textbook because it will be a useful reference for them when they actually begin teaching."Rhoda CummingsUniversity of Nevada, Reno "I have found no other textbook author who prepares adolescent behavior and development, child behavior and development, or beginning educational psychology texts...as clearly as Ormrod."William M. GrayUniversity of Toledo

The quality and productivity of a research work very much depends on the competency of the researchers. Such competency needs to be generated and nurtured properly among the researchers from the very beginning of their research career. This comprehensive book on research methodology discusses in detail how to carry out research studies in various disciplines of behavioural sciences in an organized manner. The book is meant for the postgraduate students of Education (M.Ed.), Sociology, Psychology and Management. In addition, it will also be useful to research scholars in learning the art of doing qualitative and quantitative research studies in behavioural sciences. Key Features Systematic and logical organization of the subject matter providing step-by-step description of the research methodology for conducting research studies. Extensively illustrated with working examples, diagrams and tables. A comprehensive description of the essential data collection tools employed in quantitative and qualitative research studies, along with their proper construction, standardization and validation. Complete and workable description of the techniques

and methods of data analysis used in quantitative and qualitative research studies. A complete chapter devoted to the use of computer technology for the execution of the quantitative and qualitative research studies.

Do some of your pupils suffer from low or fragile self-esteem? Perhaps you want to help, but don't know how? If so, this book is for you. Using insights from theory, research and classroom practice, it provides strategies and techniques that will enhance the confidence of primary school children through authentic learning experiences. This book includes: -discussions on a range of issues surrounding self-esteem enhancement in school -studies of recent work in this area -links between self-esteem and the development of competence (fitting in with the Raising Attainment agenda) -research evidence from real primary classrooms -a clear articulation of strategies and techniques to use in classrooms -a summary and analysis of the key theoretical and empirical work in the area The book's clear practical focus will be of interest to all teachers and managers keen to enhance self-esteem in their schools. It will prove equally useful for teachers in training and more experienced teachers undertaking further study. This book will empower you to develop your practice with a clear sense of direction - and with increased confidence. David Miller is Professor of Education at the University of Dundee.
