Executive leaders need a framework with which to evaluate current and to create new corporate ethical management systems in their organizations. This book offers such a framework, called the Moldable Model®, a system of consistent components that give leaders a framework and a guide to build an organization-specific corporate ethical management system (CEMS). This book teaches how to design ethical workplaces utilizing the role modeling, context, and accountability components. In a step-by-step process, the author guides the reader through the research-based components with definitions, theory, explanations, and the practical application of those components through suggested organizational activities. Readers can expect to develop ethical tools and a complete corporate ethical management system for implementation into their specific organizations. In just a few hours, a busy executive can have the knowledge and tools to design an ethical workplace that creates satisfied and committed employees who increase organizational productivity and competitive advantage.

Recent advances in technology and new software applications are steadily transforming human civilization into what is called the Information Society. This is manifested by the new terminology appearing in our daily activities. E-Business, E-Government, E-Learning, E-Contracting, and E-Voting are just a few of the ever-growing list of new terms that are shaping the Information Society. Nonetheless, as "Information" gains more prominence in our society, the task of securing it against all forms of threats becomes a vital and crucial undertaking.

Addressing the various security issues confronting our new Information Society, this volume is divided into 13 parts covering the following topics: Information Security Management; Standards of Information Security; Threats and Attacks to Information; Education and Curriculum for Information Security; Social and Ethical Aspects of Information Security; Information Security Services; Multilateral Security; Applications of Information Security; Infrastructure for Information Security Advanced Topics in Security; Legislation for Information Security; Modeling and Analysis for Information Security; Tools for Information Security. Security in the Information Society: Visions and Perspectives comprises the proceedings of the 17th International Conference on Information Security (SEC2002), which was sponsored by the International Federation for Information Processing (IFIP), and jointly organized by IFIP Technical Committee 11 and the Department of Electronics and Electrical Communications of Cairo University. The conference was held in May 2002 in Cairo, Egypt.

This classic volume achieves a remarkable width of appeal without sacrificing scientific accuracy or depth of analysis. It is a valuable contribution to the study of business efficiency which should be read by anyone wanting information about the developments and place of management, and it is as relevant today as when it was first written. This is a practical book, written out of many years of experience in working with managements of small, medium and large corporations. It aims to be a management guide, enabling readers to examine their own work and performance, to diagnose their weaknesses and to improve their own effectiveness as well as the results of the enterprise they are responsible for.

This book serves to provide a detailed exploration of the various leadership exhibited today. In order to better comprehend the organic link between styles of leadership, this book deals with almost all models of leadership and demonstrates how dynamic these forms of leadership actually are. It is an essential and extensive reference point for both academics and practitioners.

Women earn nearly half of all new PhDs in Canada, the United States, Australia, New Zealand, and the United Kingdom. Why, then, do they occupy a disproportionate number of the junior-level university positions while men occupy 80 percent of the more prestigious jobs? In Academic Careers and the Gender Gap, Maureen Baker draws on candid interviews with male and female scholars, previous research, and her own thirty-eight-year academic career to explain the reasons behind this inequality. She argues that current university priorities and collegial relations often magnify the impact of gendered families and identities and perpetuate the gender gap. Tracing the evolution of university priorities and practices, Baker reveals significant and persistent differences in job security, working hours, rank, salary, job satisfaction, and career length between male and female scholars.

Existing narratives about how we should organize are built upon, and reinforce, a concept of 'good management' derived from what is assumed to be a fundamental need to increase efficiency. But this assumption is based on a presentist, monocultural, and generally limited view of management's past. A New History of Management disputes these foundations. By reassessing conventional perspectives on past management theories and providing a new critical outline of

present-day management, it highlights alternative conceptions of 'good management' focused on ethical aims, sustainability, and alternative views of good practice. From this new historical perspective, existing assumptions can be countered and simplistic views disputed, offering a platform from which graduate students, researchers, and reflective practitioners can develop alternative approaches for managing and organizing in the twenty-first century.

In 1984, R. Edward Freeman published his landmark book, Strategic Management: A Stakeholder Approach, a work that set the agenda for what we now call stakeholder theory. In the intervening years, the literature on stakeholder theory has become vast and diverse. This book examines this body of research and assesses its relevance for our understanding of modern business. Beginning with a discussion of the origins and development of stakeholder theory, it shows how this corpus of theory has influenced a variety of different fields, including strategic management, finance, accounting, management, marketing, law, health care, public policy, and environment. It also features in-depth discussions of two important areas that stakeholder theory has helped to shape and define: business ethics and corporate social responsibility. The book concludes by arguing that we should re-frame capitalism in the terms of stakeholder theory so that we come to see business as creating value for stakeholders.

**Manajemen pengetahuan (knowledge management) sangat penting bagi sebuah organisasi, tak terkecuali sekolah. Pengelolaan pengetahuan sebagai salah satu sumber daya organisasi diperlukan untuk memastikan bahwa pengetahuan dapat didistribusikan dan diakses oleh setiap orang yang membutuhkan kapan dan dimanapun dia berada demi kepentingan pengembangan diri dan kemajuan organisasi. Salah satu dimensi penting knowledge management adalah knowledge sharing. Beberapa penelitian menunjukkan bahwa perilaku berbagi pengetahuan berpengaruh secara positif dan signifikan terhadap kinerja organisasi; perilaku inovatif; pengembangan organisasi, peningkatan sumber daya manusia, dan lain-lain. Berbagi pengetahuan menjadi solusi bagi banyak tantangan serius yang dihadapi organisasi, terutama dalam lingkungan berbasis pengetahuan. Dalam kenyataan, knowledge sharing tidak selalu dapat berjalan sebagaimana diharapkan. Ada banyak faktor yang dapat menghambatnya. Hambatan dapat berasal dari perilaku individu (perilaku anggota organisasi) dan faktor organisasional. Pada level individu, ada orang yang melihat pengetahuan sebagai kekuatan untuk memenangkan persaingan mendapatkan atau mempertahankan jabatan atau posisi strategis dalam organisasi. Sementara pada level organisasi, manajemen pengetahuan belum berjalan dengan baik. budaya berbagi pengetahuan belum terbangun sehingga para anggota organisasi tidak termotivasi dan terkondisikan untuk berbagi pengetahuan dengan rekan sejawatnya terutama pengetahuan terkait pekerjaan. Dalam situasi seperti ini pemimpin (kepala sekolah) ditantang untuk dapat mengembangkan perilaku berbagi pengetahuan di kalangan guru. Bagaimana strategi yang tepat untuk menguatkan perilaku berbagi pengetahuan antara guru dengan rekan sejawatnya? Buku ini menyajikan jawaban atas pertanyaan ini dalam perspektif servant leadership. Kepala sekolah yang berkomitmen untuk melayani dan mengembangkan perilaku berbagi pengetahuan di antara guru dengan rekan sejawatnya layak menjadikan buku ini sebagai rujukan. Buku ini juga sangat bermanfaat bagi pemimpin organisasi apa pun yang berkomitmen untuk mengembangkan perilaku anggota organisasinya dalam hal knowledge sharing. Buku ini layak menjadi rujukan kepala sekolah karena pembahasan dalam buku merupakan hasil riset tentang perilaku berbagi pengetahuan guru pada 28 sekolah dasar yang tersebar di Jakarta, Tangerang dan Bekasi. Lebih dari itu hasil penelitian ini diperkaya dengan banyak hasil penelitian terdahulu baik dalam bidang pendidikan maupun dunia usaha serta bidang lainnya. Temuan yang sejalan dan bertentangan dengan penelitian ini telah diramu dan memperkaya temuan penelitian yang dibahas dalam buku ini. Alasan terakhir ini menjadikan buku ini layak menjadi rujukan pemimpin dalam organisasi lainnya. Akhir penulis berharap buku ini memperkaya khazanah intelektual dalam bidang pendidikan dan berkontribusi bagi peningkatan kapasitas kepemimpinan para kepala sekolah dan pemimpin organisasi lainnya.**

This book provides that guidance. Written by a quality consultant with over 20 years experience in precisely these fields, including work with the US Defense Department, Boeing, Lockheed-Martin, Raytheon, and many other leading companies, this book provides an easily digestible toolbox of solutions to quality and management problems for every engineer, manager and even student looking for those answers for the medium to high-technology sector manufacturing company. This is a highly practical book which includes all the major topics in quality as well as case studies from relevant real-world situations yet without the need to wade through reams of reference materials and international standards verbiage. **For at least 1500 years, temple design, construction and worship have followed the canon of the ?gama-s. Shouldn't temple management also follow the ?gama-s? Steeped in a history of more than two millennia, the real bequest of India's ancient temples is that they are still living sacred spaces. The gods that were invoked in these temples more than a thousand years ago, continue to reside in the sanctums and gaze benevolently upon their devotees. The bells ring for morning service as they did a thousand years ago. The ?c?rya waves the ?rati just as another ?c?rya did a thousand years ago. No other organization in the world can boast of such amazing continuity. The secret to this longevity lies in the ?gama-s. ?gama-s are the traditional canon believed to be as old as the Vedas, with detailed manuals on temple-building, consecration and ritual worship. While the world outside the temples - a world of kings and kingdoms - has changed, temples continue to follow the ?gama-s in letter and spirit in their everyday religious function, notwithstanding the many changes in administrative formats. By studying the activities of the temple, material and manpower required, qualifications and roles prescribed for the temple professionals, this thesis attempts to reconstruct an ?gamic temple management framework, using the K?mik?gama as primary text with other ?gama-s, secondary literature and inscriptional evidence as required.**
