Paul de Kruif's *Microbe Hunters* is a timeless dramatization of the scientists, bacteriologists, doctors, and medical technicians who discovered microbes and invented the vaccines to counter them. De Kruif reveals the now seemingly simple but really fundamental discoveries of science - for instance, how a microbe was first viewed in a clear drop of rain water, and when, for the first time ever, Louis Pasteur discovered that a simple vaccine could save a man from the ravages of rabies by attacking the microbes that cause it. Globalisation turns out to be untenable because it does not guarantee minimum social equity, peace and respect for the environment, and therefore does not guarantee the effective accomplishment of human rights. This book analyzes this issue and raises proposals for a new perspective. The first part describes the soft threats to human rights, derived from the devaluation of the politics and the productive economy with regard to the finance. It entails the concealment of the reality in the shape of exploitation as the tax havens and in the shape of marginalization of the persons with different abilities. The second part include a study of hard threats to human rights and examines two cases of failed states: Afghanistan and Somalia, in which the violence has supplanted the politics and the economy. In view of these situations it is necessary to rethink the force of classic *ius gentium* and the humanitarian right. The third part presents the European Union as a legal and political space in which conditions of a worthy life are better defended by means of the Primacy of Practical Reason and Social State of Law, and by the requirement of peace as the main rule of international relations.

Laudato Si 'is Pope Francis' second encyclical which focuses on the theme of the environment. In fact, the Holy Father in his encyclical urges all men and women of good will, the rulers and all the powerful on earth to reflect deeply on the theme of the environment and the care of our planet. This is our common home, we must take care of it and love it - the Holy Father tells us - because its end is also ours.

Master modeling and simulation using Modelica, the new powerful, highly versatile object-based modeling language Modelica, the new object-based software/hardware modeling language that is quickly gaining popularity around the world, offers an almost universal approach to high-level computational modeling and simulation. It handles a broad range of application domains, for example mechanics, electrical systems, control, and thermodynamics, and facilitates general notation as well as powerful abstractions and efficient implementations. Using the versatile Modelica language and its associated technology, this text presents an object-oriented, component-based approach that makes it possible for readers to quickly master the basics of computer-supported equation-based object-oriented (EEO) mathematical modeling and simulation. Throughout the text, Modelica is used to illustrate the various aspects of modeling and simulation. At the same time, a number of key concepts underlying the Modelica language are explained with the use of modeling and simulation examples. This book: Examines basic concepts such as systems, models, and simulations Guides readers through the Modelica language with the aid of several step-by-step examples Introduces the Modelica class concept and its use in graphical and textual modeling Explores modeling methodology for continuous, discrete, and hybrid systems Presents an overview of the Modelica Standard Library and key Modelica model libraries Readers will find plenty of examples of models that simulated distinct application domains as well as examples that combine several domains. All the examples and exercises in the text are available via DrModelica. This electronic self-teaching program, freely available on the text's companion website, guides readers from simple, introductory examples and exercises to more advanced ones. Written by the Director of the Open Source Modelica Consortium, *Introduction to Modeling and Simulation of Technical and Physical Systems with Modelica* is recommended for engineers and students interested in computer-aided design, modeling, simulation, and analysis of technical and natural systems. By building on basic concepts, the text is ideal for students who want to learn modeling, simulation, and object orientation.

A 4MK Thriller Detective Porter and the team have been pulled from the hunt for Anson Bishop, the Four Monkey Killer, by the feds. When the body of a young girl is found beneath the frozen waters of Jackson Park Lagoon, she is quickly identified as Ella Reynolds, missing three weeks. But how did she get there? The lagoon froze months earlier. More baffling? She's found wearing the clothes of another girl, missing less than two days. While the detectives of Chicago Metro try to make sense of the quickly developing case, Porter secretly continues his pursuit of 4MK, knowing the best way to find Bishop is to track down his mother. When the captain finds out about Porter's activities, he's suspended, leaving his partners Clair and Nash to continue the search for the new killer alone. Obsessed with catching Bishop, Porter follows a single grainy photograph from Chicago to the streets of New Orleans and stumbles into a world darker than he could have possibly imagined, where he quickly realizes that the only place more frightening than the mind of a serial killer is the mind of the mother from which he came.

So begins this honest and powerful account of a family's journey to the fields of California -- to a life of constant moving, from strawberry fields to cotton fields, from tent cities to one-room shacks, from picking grapes to topping carrots and thinning lettuce. Available in English for the first time, this best-selling Turkish classic of love and alienation in a changing world captures the vibrancy of interwar Berlin. A shy young man leaves his home in rural Turkey to learn a trade and discover life in 1920s Berlin. There, amidst the city's

bustling streets, elegant museums, passionate politics, and infamous cabarets, a chance meeting with a beautiful half-Jewish artist transforms him forever. Caught between his desire for freedom from tradition and his yearning to belong, he struggles to hold on to the new life he has found with the woman he loves. Emotionally powerful, intensely atmospheric, and touchingly profound, Madonna in a Fur Coat is an unforgettable novel about new beginnings, the relentless pull of family ties, and the unfathomable nature of the human soul. First published in 1943, this novel, with its quiet yet insistent defiance of social norms, has been topping best-seller lists in Turkey since 2013.

Convertido en maestro del amor, Francesco regresa para infundirnos el aliento que necesitamos cuando la vida se torna carente de sentido. En la cuarta entrega de la exitosa saga que ha transformado la vida de miles de lectores, Francesco regresa al cielo con nuevos bríos: desea ser el maestro del amor. Su misión consistirá en descender a la tierra para acompañar a las personas que sufren y mostrarles la forma de solucionar sus problemas, sin que ellas descubran su identidad ni los propósitos que lo motivan. En el transcurso de esta empresa no faltarán los enredos ni los malos entendidos, pues dos almas se disputan la presencia de Francesco a su lado en esta nueva vida. Basado en historias reales y canalizaciones del mismo Francesco, Yohana García nos entrega una nueva y deslumbrante obra cuyas páginas brindan un mensaje de fe y esperanza, que tocará una vez más el corazón de sus lectores. Amid the turbulence of World War II, a young German woman finds a precarious haven closer to the source of danger than she ever imagined—one that will propel her through the extremes of privilege and terror under Hitler’s dictatorship . . . In early 1943, Magda Ritter’s parents send her to relatives in Bavaria, hoping to keep her safe from the Allied bombs strafing Berlin. Young German women are expected to do their duty—working for the Reich or marrying to produce strong, healthy children. After an interview with the civil service, Magda is assigned to the Berghof, Hitler’s mountain retreat. Only after weeks of training does she learn her assignment: she will be one of several young women tasting the Führer’s food, offering herself in sacrifice to keep him from being poisoned. Perched high in the Bavarian Alps, the Berghof seems worlds away from the realities of battle. Though terrified at first, Magda gradually becomes used to her dangerous occupation—though she knows better than to voice her misgivings about the war. But her love for a conspirator within the SS, and her growing awareness of the Reich’s atrocities, draw Magda into a plot that will test her wits and loyalty in a quest for safety, freedom, and ultimately, vengeance. Vividly written and ambitious in scope, The Taster examines the harrowing moral dilemmas of war in an emotional story filled with acts of extraordinary courage. Praise for V.S. Alexander’s The Magdalen Girls “Fans of Barbara Davis and Ashley Hay will enjoy this tenderhearted story of sinner, saints, and redemption.” --Booklist “Alexander has clearly done his homework. Chilling in its realism, his work depicts the improprieties long abandoned by the Catholic Church and only recently acknowledged. Fans of the book and film Philomena will want to read this.” --Library Journal

The real story behind the Tavistock Institute and its network, from a popular conspiracy expert The Tavistock Institute, in Sussex, England, describes itself as a nonprofit charity that applies social science to contemporary issues and problems. But this book posits that it is the world's center for mass brainwashing and social engineering activities. It grew from a somewhat crude beginning at Wellington House into a sophisticated organization that was to shape the destiny of the entire planet, and in the process, change the paradigm of modern society. In this eye-opening work, both the Tavistock network and the methods of brainwashing and psychological warfare are uncovered. With connections to U.S. research institutes, think tanks, and the drug industry, the Tavistock has a large reach, and Tavistock Institute attempts to show that the conspiracy is real, who is behind it, what its final long term objectives are, and how we the people can stop them.

In the small southern town of Chin-kiang, two young girls from very different worlds collide and become inseparable companions. Willow is hardened by poverty and fearful for her future; Pearl is the daughter of a Christian missionary who desperately wishes she was Chinese too. Neither could have foreseen the transformation of the little American girl embarrassed by her blonde hair into the Nobel Prize-winning writer and one of China's modern heroines, Pearl S. Buck. When the country erupts in civil war between the Nationalists and the Communists, Pearl and Willow are brutally reminded of their differences. Pearl's family is forced to flee the country and Willow is punished for her loyalty to her 'cultural imperialist' friend. And yet, in the face of everything that threatens to tear them apart, the paths of these two women remain intimately entwined.

With contributions from 35 leading economists, this forward-looking book explores the future of development economics against the background of the past half-century of development thought and practice. Outstanding representatives of the past two generations of development economists assess development thinking at the turn of the century and look to the unsettled questions confronting the next generation. The volume offers a thorough analysis of the broad range of issues involved in development economics, and it is especially timely in its critique of what is needed in development theory and policy to reduce poverty. An overriding issue is whether in the future 'development economics' is to be regarded simply as applied economics or whether the nature and scope of development economics will constitute a need for a special development theory to supplement general economic theory. 'Frontiers of Development Economics' is an ideal reference for all those working in the international development community.

A collection of twenty-two fairy tales by the Nobel Prize-winning novelist, most translated into English for the first time, show the influence of German Romanticism, psychoanalysis, and Eastern religion on his development as an author.

The New York Times Bestseller '[An] earth-shaking expos é of clerical corruption' - National Catholic Reporter In the Closet of the Vatican exposes the rot at the heart of the Vatican and the Roman Catholic Church today. This brilliant piece of investigative writing is based on four years' authoritative research, including extensive interviews with those in power. The celibacy of priests, the condemnation of the use of contraceptives, the cover up of countless cases of sexual abuse, the resignation of Benedict XVI, misogyny among the clergy, the dramatic fall in Europe of the number of vocations to the priesthood, the plotting against Pope Francis – all these issues are clouded in mystery and secrecy. In the Closet of the Vatican is a book that reveals these secrets and penetrates this enigma. It derives from a system founded on a clerical culture of secrecy which starts in junior seminaries and continues right up to the Vatican itself. It is based on the double lives of priests and on extreme homophobia. The resulting schizophrenia in the Church is hard to fathom. But the more a prelate is homophobic, the more likely it is that he is himself gay. 'Behind rigidity there is always something hidden, in many cases a double life'. These are the words of Pope Francis himself and with them the Pope has unlocked the Closet. No one can claim to really understand the Catholic Church today until they have read this book. It reveals a truth that is extraordinary and disturbing.

Francesco returns from his stay in Heaven in the body of Augustine. He brings back lessons he learned from the masters above giving new meaning to existence.

This stunning set, complete with all four books, makes the perfect gift for fans of the bestselling vampire love story. Deeply romantic and extraordinarily suspenseful, Twilight, New Moon, Eclipse, and Breaking Dawn capture the struggle between defying our instincts and satisfying our desires.

To make the journey into the Now we will need to leave our analytical mind and its false created self, the ego, behind. From the very first page of Eckhart Tolle's extraordinary book, we move rapidly into a significantly higher altitude where we breathe a lighter air. We become connected to the indestructible essence of our Being, "The eternal, ever present One Life beyond the myriad forms of life that are subject to birth and death." Although the journey is challenging, Eckhart Tolle uses simple language and an easy question and answer format to guide us. A word of mouth phenomenon since its first publication, The Power of Now is one of those rare books with the power to create an experience in readers, one that can radically change their lives for the better.

The Princess Who Believed in Fairy Tales is an enchanting and inspiring modern-day story set in olden times that symbolizes the journey we all take through life as we sort out illusion from reality, come to terms with our childhood dreams and pain, and discover who we really are and how life works.

Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control – from the author of *The Laws of Human Nature*. In the book that *People* magazine proclaimed “beguiling” and “fascinating,” Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for prudence (“Law 1: Never Outshine the Master”), others teach the value of confidence (“Law 28: Enter Action with Boldness”), and many recommend absolute self-preservation (“Law 15: Crush Your Enemy Totally”). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, *The 48 Laws of Power* is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game.

L'idea costruita è il manifesto teorico di Alberto Campo Baeza; una raccolta di testi di varia provenienza che manifesta la chiarezza del suo pensiero e la straordinaria coerenza della sua opera. Concentrandosi sui fondamenti della disciplina (la luce, il confronto con la gravità, il valore delle idee, il flusso incessante della storia) l'autore redige un testo colto ma volontariamente antiaccademico, aperto alle suggestioni delle altre discipline artistiche ma con una evidente passione didattica. I testi sui grandi maestri dell'architettura spagnola (Fisac, De la Sota, Sáenz de Oíza, Coderch, Carvajal), mondiale (Mies van der Rohe, Utzon), o sui colleghi della scena internazionale (Ando, Chipperfield, Ilinás, Vicens e Ramos) mettono in luce il suo percorso culturale e la sua idea di architettura, basata sul suo rigoroso «más con menos». «La storia dell'architettura, lungi dall'essere solo una storia delle forme, è fundamentalmente una storia delle idee costruite. Le forme si disgregano col tempo ma le idee rimangono, sono eterne». «Un'architettura che ha nell'idea la sua origine, nella luce il suo primo materiale, nello spazio essenziale la volontà di ottenere il più con meno».

Unfurling like a medieval book of days, each page of Eduardo Galeano's *Children of the Days* has an illuminating story that takes inspiration from that date of the calendar year, resurrecting the heroes and heroines who have fallen off the historical map, but whose lives remind us of our darkest hours and sweetest victories. Challenging readers to consider the human condition and our own choices, Galeano elevates the little-known heroes of our world and decries the destruction of the intellectual, linguistic, and emotional treasures that we have all but forgotten. Readers will discover many inspiring narratives in this collection of vignettes: the Brazilians who held a “smooch-in” to protest against a dictatorship for banning kisses that “undermined public morals;” the astonishing day Mexico invaded the United States; and the “sacrilegious” women who had the effrontery to marry each other in a church in the Galician city of A Coruna in 1901. Galeano also highlights individuals such as Pedro Fernandes Sardinha, the first bishop of Brazil, who was eaten by Caete Indians off the coast of Alagoas, as well as Abdul Kassem Ismael, the grand vizier of Persia, who kept books safe from war by creating a walking library of 117,000 tomes aboard four hundred camels, forming a mile-long caravan. Beautifully translated by Galeano's longtime collaborator, Mark Fried, *Children of the Days* is a majestic humanist treasure that shows us how to live and how to remember. It awakens the best in us.
