Environmental Microbiology examines the composition and behavior of microbial communities in their natural habitats as well as their central role in the biosphere, impacting drinking water, waste treatment, nutrient dynamics, hydrothermal activities, and the evolution and spread of pathogens, etc.

Sequestered within the heart of a cosmopolitan city is an exotic world--a place where diamonds, astronomically priced, are bought and sold on the strength of a handshake, and business disputes are resolved according to ancient Jewish principles of arbitration. Yet it is also a modern industry facing the same fundamental global changes affecting all businesses today. In *Diamond Stories*, Renée Rose Shield leads us into the unexamined realm of wholesale diamond traders in New York. Related to several well-respected traders, she had unprecedented access to a society normally closed to outside inquiry. Here she deftly blends her personal relationship and her anthropological training to provide an insightful exploration of this tradition-bound industry, the new challenges it faces, and the ways both industry and individuals adapt to and endure change. Shield begins with a fascinating history of diamond mining, combining the story of the De Beers cartel, the role of Jews in the trade, and the part diamonds have played both in war and liberation. Throughout, she incorporates commentary by current diamond traders. Succeeding chapters explore the evolving nature of both the global trade and the New York diamond district. Shield takes a close look at the increasingly complex ethnic makeup of the district, illuminates the rarely documented work done by women, chronicles the resilient system of arbitration, and reveals the ways in which many traders work well into their eighties and nineties. Their long lives of work, cushioned by the trade's social environment, offer hints for successful aging in general.

With the "right-hand diamond" all the rage right now, it is important for women to stay informed of the particulars when it comes to shopping for a diamond. Even if a woman is searching for an engagement ring with her fiance she should learn the basics to help

him out, and to prevent her personal style from being compromised by uninformed choices. *A Girls' Guide to Buying Diamonds* provides all the key facts any woman needs to know before purchasing her ice. This style manual shows readers how to choose the perfect diamond, based on lifestyle, personality, even hand shape, all from a woman's perspective. Beautiful illustrations and photographs enhance discussions of bands, settings, cuts, and how to identify imperfections. Practical advice teaches readers to select a jeweler, arms them with questions to ask, as well as questions they should expect to hear. *A Girls' Guide to Buying Diamonds* is a must have for any girl-or boy-game for splurging on the ultimate glamorous accessory. Collection of the monthly climatological reports of the United States by state or region, with monthly and annual national summaries.

One of the foundations for change in our society comes from designing. Its genesis is the notion that the world around us either is unsuited to our needs or can be improved. The need for designing is driven by a society's view that it can improve or add value to human existence well beyond simple subsistence. As a consequence of designing the world which we inhabit is increasingly a designed rather than a naturally occurring one. In that sense it is an "artificial" world. Designing is a fundamental precursor to manufacturing, fabrication, construction or implementation. Design research aims to develop an understanding of designing and to produce models of designing that can be used to aid designing. Artificial intelligence has provided an environmental paradigm within which design research based on computational constructions, can be carried out. Design research can be carried out in variety of ways. It can be viewed as largely an empirical endeavour in which experiments are designed and executed in order to test some hypothesis about some design phenomenon or design behaviour. This is the approach adopted in cognitive science. It often manifests itself through the use of protocol studies of designers. The results of such research form the basis of a computational model. A second view is that design research can be carried out by positing axioms and then deriving consequences from them.

In its 114th year, Billboard remains the world's premier weekly music publication and a diverse digital, events, brand, content and data licensing platform. Billboard publishes the most trusted charts and offers unrivaled reporting about the latest music, video, gaming, media, digital and mobile entertainment issues and trends.
