Their religion directly denied Jesus as Messiah, and their arrogance, lies, usury, and hatred of humanity meant that they posed a mortal threat to society. Hence, said Luther, the harshest of measures are warranted. A shocking book.

A cannon. A strap. A piece. A biscuit. A burner. A heater. A chopper. A gat. A hammer A tool for RULE Or, you can call it a gun. That’s what fifteen-year-old Will has shoved in the back waistband of his jeans. See, his brother Shawn was just murdered. And Will knows the rules. No crying. No snitching. Revenge. That’s where Will’s now heading, with that gun shoved in the back waistband of his jeans, the gun that was his brother’s gun. He gets on the elevator, seventh floor, stoked. He knows who he’s after. Or does he? As the elevator stops on the sixth floor, on comes Buck. Buck, Will finds out, is who gave Shawn the gun before Will took the gun. Buck tells Will to check that the gun is even loaded. And that’s when Will sees that one bullet is missing. And the only one who could have fired Shawn’s gun was Shawn. Huh. Will didn’t know that Shawn had ever actually USED his gun. Bigger huh. BUCK IS DEAD. But Buck’s in the elevator? Just as Will’s trying to think this through, the door to the next floor opens. A teenage girl gets on, waves away the smoke from Dead Buck’s cigarette. Will doesn’t know her, but she knew him. Knew. When they were eight. And stray bullets had cut through the playground, and Will had tried to cover her, but she was hit anyway, and so what she wants to know, on that fifth floor elevator stop, is, what if Will, Will with the gun shoved in the back waistband of his jeans, MISSES. And so it goes, the whole long way down, as the elevator stops on each floor, and at each stop someone connected to his brother gets on to give Will a piece to a bigger story than the one he thinks he knows. A story that might never know an END...if Will gets off that elevator. Told in short, fierce staccato narrative verse, Long Way Down is a fast and furious, dazzlingly brilliant look at teenage gun violence, as could only be told by Jason Reynolds.

"Copyright law and contract language are complex, even for attorneys and experts. Authors may be tempted to sign the first version of a publication contract that they receive, especially if negotiating seems complicated, intimidating, or risky. But there is a lot at stake for authors in a book deal, and it is well worth the effort to read the contract, understand its contents, and negotiate for favorable terms. To that end, Understanding and Negotiating Book Publication Contracts identifies clauses that frequently appear in publishing contracts, explains in plain language what these terms (and typical variations) mean, and presents strategies for negotiating "author-friendly" versions of these clauses. When authors have more information about copyright and publication options for their works, they are better able to make and keep their works available in the ways they want"--Publisher.

The Constitutional Change We Need to Protect Our Priceless Natural Resources For decades, activists have relied on federal and state legislation to fight for a cleaner environment. And for decades, they've been fighting a losing battle. The sad truth is, our laws are designed to accommodate pollution rather than prevent it. It's no wonder people feel powerless when it comes to preserving the quality of their water, air, public parks, and special natural spaces. But there is a solution, argues veteran environmentalist Maya K. van Rossum: bypass the laws and turn to the ultimate authority--our state and federal constitutions. In 2013, van Rossum and her team won a watershed legal victory that not only protected Pennsylvania communities from ruthless frackers but affirmed the constitutional right of people in the state to a clean and healthy environment. Following this victory, van Rossum inaugurated the Green Amendment movement, dedicated to empowering every American community to mobilize for constitutional change. Now, with The Green Amendment, van Rossum lays out an inspiring new agenda for environmental advocacy, one that will finally empower people, level the playing field, and provide real hope for communities everywhere. Readers will discover: - how legislative environmentalism has failed communities across America, - the

transformational difference environmental constitutionalism can make, - the economic imperative of environmental constitutionalism, and - how to take action in their communities. We all have the right to pure water, clean air, and a healthy environment. It's time to claim that right--for our own sake and that of future generations.

International Standard Banking Practice (ISBP) for the examination of documents under documentary credits, answers the most relevant questions practitioners have concerning how UCP 500, ICC's universally used rules on documentary credits, are to be integrated into day-to-day practice. The product of more than two years of work by the ICC Banking Commission, ISBP is based on the official Opinions issued by the Banking Commission in response to queries submitted by users of UCP 500. The text provides responses to the key questions relating to the examination of drafts, multimodal transport documents, insurance documents, certificates of origin and a range of other documents associates with letters of credit. This publication reflects international standard banking practice for all parties to a documentary credit. Figures show that 60%-70% of credits are rejected for discrepancies on first presentation. The new ISBP, by encouraging a uniformity of practice worldwide, is expected to cut these figures dramatically and, by doing so, to facilitate the flow of world trade.

This public domain book is an open and compatible implementation of the Uniform System of Citation.

A young journalist from the Midwest describes her sojourn in Iraq as the Baghdad Bureau Chief for the "Washington Post," detailing what it is like to cover a war under the constant threat of kidnapping, injury, and death.

Ngo Dinh Diem, the first president of the Republic of Vietnam, possessed the Confucian "Mandate of Heaven", a moral and political authority that was widely recognized by all Vietnamese. This devout Roman Catholic leader never lost this mandate in the eyes of his people; rather, he was taken down by a military coup sponsored by the U.S. government, which resulted in his brutal murder. The commonly held view runs contrary to the above assertion by military historian Geoffrey Shaw. According to many American historians, President Diem was a corrupt leader whose tyrannical actions lost him the loyalty of his people and the possibility of a military victory over the North Vietnamese. The Kennedy Administration, they argue, had to withdraw its support of Diem. Based on his research of original sources, including declassified documents of the U.S. government, Shaw chronicles the Kennedy administration's betrayal of this ally, which proved to be not only a moral failure but also a political disaster that led America into a protracted and costly war. Along the way, Shaw reveals a President Diem very different from the despot portrayed by the press during its coverage of Vietnam. From eyewitness accounts of military, intelligence, and diplomatic sources, Shaw draws the portrait of a man with rare integrity, a patriot who strove to free his country from Western colonialism while protecting it from Communism.

#1 New York Times Bestseller "Significant...The book is both instructive and surprisingly moving." —The New York Times Ray Dalio, one of the world's most successful investors and entrepreneurs, shares the unconventional principles that he's developed, refined, and used over the past forty years to create unique results in both life and business—and which any person or organization can adopt to help achieve their goals. In 1975, Ray Dalio founded an investment firm, Bridgewater Associates, out of his two-bedroom apartment in New York City. Forty years later, Bridgewater has made more money for its clients than any other hedge fund in history and grown into the fifth most important private company in the United States, according to Fortune magazine. Dalio himself has been named to Time magazine's list of the 100 most influential people in the world. Along the way, Dalio discovered a set of unique principles that have led to Bridgewater's exceptionally effective culture, which he describes as "an idea meritocracy that strives to achieve meaningful work and meaningful relationships through radical transparency." It is these principles, and not anything special about Dalio—who grew up an ordinary kid in a middle-class Long Island neighborhood—that he believes are the reason behind his success. In Principles, Dalio shares what he's learned over the course of his remarkable career. He argues that life, management, economics, and investing can all be systemized into rules and understood like machines. The book's hundreds of practical lessons, which are built around his cornerstones of "radical truth" and "radical transparency," include Dalio laying out the most effective ways for individuals and organizations to make decisions, approach challenges, and build strong teams. He also describes the innovative tools the firm uses to bring an idea meritocracy to life, such as creating "baseball cards" for all employees that distill their strengths and weaknesses, and employing computerized decision-making systems to make believability-weighted decisions. While the book brims with novel ideas for organizations and institutions, Principles also offers a clear, straightforward approach to decision-making that Dalio believes anyone can apply, no matter what they're seeking to achieve. Here, from a man who has been called both "the Steve Jobs of investing" and "the philosopher king of the financial universe" (CIO magazine), is a rare opportunity to gain proven advice unlike anything you'll find in the conventional business press.

This comprehensive account of the establishment of the WTO focuses on those who shaped its creation as well as those who have influenced its evolution. It also examines trade negotiations, the WTO's dispute settlement role, the process of joining, and what lies ahead for the organization.

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.
