*journey working at the forefront of In Vitro Fertilisation (IVF), test tube baby research. It recounts the challenges that went into establishing IVF in the wake of Steptoe and Edwards and provides a cautionary tale of how necessary it is to pay attention to what's going on in your own family. There are no other published books that detail the development of IVF in the UK from the perspective of someone who was at the cutting edge, but it is told from a very human and personal view point to appeal to a wide variety of readers. The author started as a homeless teenager from Grimsby and later became one of the founding fathers of IVF. Throughout the 1980s and 90s and for years after that, he played a key part in its scientific progress. The dedication to bring children into the lives of thousands of infertile families, came at a cost of losing his own family. Dr Steve Green PhD is a Clinical Embryologist and is regarded today as one of the founding fathers of Modern Embryology. In 1981 he began working on the techniques that would become routine in treating infertility and was the embryologist responsible for the first test tube baby (IVF) twins and triplets in the UK in 1982 and 1984 respectively. In 1995 while at the nurture unit, Dr Green was part of the team that achieved the first pregnancy in the world after treating a couple with ICSI using the immature sperm. Dr Green now lives in County Antrim, Northern Ireland and has published over 50 academic papers and is still very active in the field where his interests are focussed on egg vitrification; a special technique of freezing and time-lapse imaging of embryo development.***

He acted with Jeremy Irons, Charles Dance, Anthony Hopkins, Michael Caine, Peggy Ashcroft and Judi Dench and collaborated with a host of famous directors, from his late friend Howard Davies, to John Huston and Peter Hall. What is the story of Judi Dench and the black glove? What was it like to visit Michael Caine's LA mansion? How does one produce the character of the complex and unforgettable Corporal Merrick? ***First published in 1989, this is the second of three volumes exploring the changing notions of patriotism in British life from the thirteenth century to the late twentieth century and constitutes an attempt to come to terms with the power of the national idea through a historically informed critique. This volume examines how national identity has competed with alternative, more personal forms of belonging — such as Roman Catholicism, Judaism and Nonconformism — as well looking at femininity in relation to the state. Contemporary British society's capacity to create outsiders is discussed and the introductory essay shows how this may shape our misunderstanding of earlier phases of national development.***

Why is it getting harder to secure a job that matches our qualifications, buy a home of our own and achieve financial stability? Underprivileged people have always faced barriers, but people from middle-income families are increasingly more likely to slide down the social scale than climb up. Duncan Exley, former Director of the Equality Trust, draws on expert research and real life experiences – including from an actor, a politician, a billionaire entrepreneur and a surgeon – to issue a wake-up call to break through segregated opportunity. He offers a manifesto to reboot

our prospects and benefit all.

When John Ruth arrived in the United Kingdom from Ireland as a boy in the late 1950's. He had little idea of the challenging times that awaited him. With his elder sister Brenda and brother Liam, he was enrolled in a strict Dominican Roman Catholic boarding school at Ponsbourne Park in the remote Hertfordshire countryside. He soon discovered that this place was as cruel, oppressive and mysterious as any five year old child could imagine. He found himself separated from not only his parents, but also his two elder siblings. A few cruel nuns meted out punishment and strict discipline against a backdrop of changing values in those post war years. His harrowing journey continued into the emerging Rock 'n' Roll years that were captivating the youth of the day, and challenging the outdated views and traditions that were held by those in authority. It also describes moving acts of kindness from some of the same nuns who tried to make life easier for many of the unfortunate children in their care. This first part of his story covers his experiences from early childhood to puberty, and captures glimpses of the harshness and occasional brutality of the nuns to some of the more vulnerable children in their care. It illustrates some of the double standards that existed between the haves and have-nots who shared the same education, but certainly not the same privileges.

Washback refers to the influence of language testing on teaching and learning. This volume, at the important intersection of language testing and teaching practices, presents theoretical, methodological, and practical guidance for current and future washback studies. In the field of language testing, researchers' major interest has traditionally been focused on issues and solving problems inherent in tests in order to increase their reliability and validity. However, the washback effect goes well beyond the test itself to include factors, such as curriculum, teacher and learner behaviors inside and outside the classroom, their perceptions of the test, and how test scores are used. Only recently have researchers started to empirically investigate the phenomenon of washback. This volume of such research serves two essential purposes by: \*providing an overview of the complexity of washback and the various contextual factors entangled within testing, teaching, and learning; and \*presenting empirical studies from around the world that offer insights into the effects of washback in specific educational contexts and models of research on which future studies can be based. The extensive use of test scores for various educational and social purposes in society nowadays makes the washback effect a high-interest phenomenon in the day-to-day educational activities of teachers, researchers, program coordinators/directors, policymakers,

and others in the field of education. Washback in Language Testing: Research Contexts and Methods is a valuable resource for those who are interested in the application of findings to actual teaching and learning situations or conduct washback research in their own contexts, including educational and psychological testing experts, as well as alternative assessment people in all fields, and for policy- and decision-makers in educational and testing organizations. “Stunning photographs” and firsthand accounts propel a book that “brings together the memories of more than 200 child survivors of the Blitz” (Daily Mail). It was not just the upheaval caused by evacuation and the blitzes that changed a generation’s childhood, it was how war pervaded every aspect of life. From dodging bombs by bicycle and patrolling the parish with the vicar’s WWI pistol, to post air raid naps in school and being carried out of the rubble as the family’s sole survivor, children experienced life in the war zone that was Britain. This reality, the reality of a life spent growing up during the Second World War, is best told through the eyes of the children who experienced it firsthand. Children in the Second World War unites the memories of over two hundred child veterans to tell the tragic and the remarkable stories of life, and of youth, during the war. Each veteran gives a unique insight into a childhood that was unlike any that came before or after. This book poignantly

illustrates the presence of death and perseverance in the lives of children through this tumultuous period. Each account enlightens and touches the reader, shedding light on what it was really like on the home front during the Second World War.

This book contains everything a parent needs to know about the 11+ exam, including how to apply, which subjects are set, when to apply, what grammar schools are like and how to appeal. It is packed full of unique tips and helpful advice for children who will be taking the 11+ exam. It has been written by a teacher with over 20 years experience of preparing children for the 11+.

Following on from Practice Papers 1, these papers further test pupils in preparation for the most challenging of pre-tests and 11+ independent school entrance exams.
