

Honda Fes 125 Pantheon Manual

Ritual is too often equated with unvarying or repetitive behavior. This impression is encouraged by the ethnographic tendency toward an overly narrow time frame, which highlights current relationships and conditions rather than long-term developments. The Rousing Drum takes a different view. It adopts a historical perspective encompassing several hundred years in exploring the role of ritual as an effective medium for negotiating sociopolitical and economic change. The setting is Furukawa, a town located in Japan's mountainous interior. Every spring the local Shinto shrine festival provides an opportunity for enacting social relationships and attitudes. By day, a portable shrine containing the spirit of the guardian deity is escorted through town in a stately procession. At night, however, a different scenario unfolds. A barrel-shaped drum is borne through the nighttime streets on a massive grid-like platform. Prominent members of the community are obliged to ride upon the platform, while teams of young adults rush out and attack it as it passes through their respective neighborhoods. The action can become quite unruly, and random fights and injuries are accepted as inevitable correlates. In analyzing the festival over time, Schnell reveals a dramatic transformation. The drum ritual, which originated as a minor preliminary to the other events, emerged during the late 1800s as an occasion for airing hostilities and settling scores. As Japan's modernization progressed, the ritual performance came to embody a symbolic challenge to institutionalized authority, and occasionally escalated into politically motivated violence. While the religious ceremonies observed during the day were appropriated by local power holders, the nighttime drum ritual represented a folk response to the officially sanctioned liturgy. The festival as a whole thus represented the clash of competing ideologies within the context of a single public forum. Today's ritual, rather tame by comparison, is being transformed into a tourist attraction aligned with the town's economic development objectives. Schnell's careful examination of the ethnohistorical data offers a valuable new perspective on Japanese festivals as well as the events and conditions that influence their development. His innovative look at ritual behavior over time persuades us that we can grasp the underlying significance of such activities only if we consider them within the context of larger historical patterns.

With more than half its population under twenty years old, Iran is one of the world's most youthful nations. The Iranian state characterizes its youth population in two ways: as a homogeneous mass, "an army of twenty millions" devoted to the Revolution, and as alienated, inauthentic, Westernized consumers who constitute a threat to the society. Much of the focus of the Islamic regime has been on ways to protect Iranian young people from moral hazards and to prevent them from providing a gateway for cultural invasion from the West. Iranian authorities express their anxieties through campaigns that target the young generation and its lifestyle and have led to the criminalization of many of the behaviors that make up youth culture. In this ethnography of contemporary youth culture in Iran's capital, Shahram Khosravi examines how young Tehranis struggle for identity in the battle over the right to self-expression. Khosravi looks

closely at the strictures confronting Iranian youth and the ways transnational cultural influences penetrate and flourish. Focusing on gathering places such as shopping centers and coffee shops, Khosravi examines the practices of everyday life through which young Tehranis demonstrate defiance against the official culture and parental dominance. In addition to being sites of opposition, Khosravi argues, these alternative spaces serve as creative centers for expression and, above all, imagination. His analysis reveals the transformative power these spaces have and how they enable young Iranians to develop their own culture as well as individual and generational identities. The text is enriched by examples from literature and cinema and by vivid reports from the author's fieldwork.

*Seventy-nine Short Essays on Design brings together the best of designer Michael Bierut's critical writing—serious or humorous, flattering or biting, but always on the mark. Bierut is widely considered the finest observer on design writing today. Covering topics as diverse as Twyla Tharp and ITC Garamond, Bierut's intelligent and accessible texts pull design culture into crisp focus. He touches on classics, like Massimo Vignelli and the cover of *The Catcher in the Rye*, as well as newcomers, like McSweeney's *Quarterly Concern* and color-coded terrorism alert levels. Along the way Nabakov's *Pale Fire*; Eero Saarinen; the paper clip; *Celebration, Florida*; the planet Saturn; the ClearRx pill bottle; and paper architecture all fall under his pen. His experience as a design practitioner informs his writing and gives it truth. In *Seventy-nine Short Essays on Design*, designers and nondesigners alike can share and revel in his insights.*

*Many indigenous Hawaiian men have felt profoundly disempowered by the legacies of colonization and by the tourist industry, which, in addition to occupying a great deal of land, promotes a feminized image of Native Hawaiians (evident in the ubiquitous figure of the dancing hula girl). In the 1990s a group of Native men on the island of Maui responded by refashioning and reasserting their masculine identities in a group called the Hale Mua (the "Men's House"). As a member and an ethnographer, Ty P. Kōwika Tengan analyzes how the group's mostly middle-aged, middle-class, and mixed-race members assert a warrior masculinity through practices including martial arts, woodcarving, and cultural ceremonies. Some of their practices are heavily influenced by or borrowed from other indigenous Polynesian traditions, including those of the Mōri. The men of the Hale Mua enact their refashioned identities as they participate in temple rites, protest marches, public lectures, and cultural fairs. The sharing of personal stories is an integral part of Hale Mua fellowship, and Tengan's account is filled with members' first-person narratives. At the same time, Tengan explains how Hale Mua rituals and practices connect to broader projects of cultural revitalization and Hawaiian nationalism. He brings to light the tensions that mark the group's efforts to reclaim indigenous masculinity as they arise in debates over nineteenth-century historical source materials and during political and cultural gatherings held in spaces designated as tourist sites. He explores class status anxieties expressed through the sharing of individual life stories, critiques of the Hale Mua registered by Hawaiian women, and challenges the group received in dialogues with other indigenous Polynesians. *Native Men Remade* is*

the fascinating story of how gender, culture, class, and personality intersect as a group of indigenous Hawaiian men work to overcome the dislocations of colonial history.

Gray's central thesis asserts that the Jamaican state is a form of predatory state that incorporates contradictory social forces into an arrangement that is hierarchical, often brutal and ultimately debilitating to democracy. He introduces a series of constructs to support this argument, but the more interesting and novel theses are to be found in his vivid description of the social forces that resist the predatory state and how they have carved out a modicum of autonomy based on what he describes as an elaborate value system of badness/honour. Formed by a small group of university students in the early 1980s, Studio Gainax is now one of the most adventurous and widely esteemed anime companies on the scene. And it is fascinating for its unique approach to animation. Formal experimentation, genre-straddling, self-reflexivity, unpredictable plot twists, a gourmet palate for stylishness, proverbially controversial endings, and a singularly iconoclastic worldview are some of the hallmarks. This documentation of the studio's achievements provides a critical overview of both the company and its films: in-depth examinations of particular titles that best represent the company's overall work, including television series such as Nadia: The Secret of Blue Water and Neon Genesis Evangelion, and feature films such as Royal Space Force: The Wings of Honneamise and Gunbuster vs. Diebuster. Each chapter highlights the contribution made by a specific production to the company's progress.

Cinema and the Cultural Cold War explores the ways in which postwar Asian cinema was shaped by transnational collaborations and competitions between newly independent and colonial states at the height of Cold War politics. Sangjoon Lee adopts a simultaneously global and regional approach when analyzing the region's film cultures and industries. New economic conditions in the Asian region and shared postwar experiences among the early cinema entrepreneurs were influenced by Cold War politics, US cultural diplomacy, and intensified cultural flows during the 1950s and 1960s. By taking a closer look at the cultural realities of this tumultuous period, Lee comprehensively reconstructs Asian film history in light of the international relationships forged, broken, and re-established as the influence of the non-aligned movement grew across the Cold War. Lee elucidates how motion picture executives, creative personnel, policy makers, and intellectuals in East and Southeast Asia aspired to industrialize their Hollywood-inspired system in order to expand the market and raise the competitiveness of their cultural products. They did this by forming the Federation of Motion Picture Producers in Asia, co-hosting the Asian Film Festival, and co-producing films. Cinema and the Cultural Cold War demonstrates that the emergence of the first intensive postwar film producers' network in Asia was, in large part, the offspring of Cold War cultural politics and the product of American hegemony. Film festivals that took place in cities as diverse as Tokyo, Singapore, Hong Kong, and Kuala Lumpur were annual showcases of cinematic talent as well as opportunities for the Central Intelligence Agency to establish and maintain cultural, political, and institutional

linkages between the United States and Asia during the Cold War. Cinema and the Cultural Cold War reanimates this almost-forgotten history of cinema and the film industry in Asia.

When rock 'n' roll emerged in the 1950s, ministers denounced it from their pulpits and Sunday school teachers warned of the music's demonic origins. The big beat, said Billy Graham, was "ever working in the world for evil." Yet by the early 2000s Christian rock had become a billion-dollar industry. The Devil's Music tells the story of this transformation. Rock's origins lie in part with the energetic Southern Pentecostal churches where Elvis, Little Richard, James Brown, and other pioneers of the genre worshipped as children. Randall J. Stephens shows that the music, styles, and ideas of tongue-speaking churches powerfully influenced these early performers. As rock 'n' roll's popularity grew, white preachers tried to distance their flock from this "blasphemous jungle music," with little success. By the 1960s, Christian leaders feared the Beatles really were more popular than Jesus, as John Lennon claimed. Stephens argues that in the early days of rock 'n' roll, faith served as a vehicle for whites' racial fears. A decade later, evangelical Christians were at odds with the counterculture and the antiwar movement. By associating the music of blacks and hippies with godlessness, believers used their faith to justify racism and conservative politics. But in a reversal of strategy in the early 1970s, the same evangelicals embraced Christian rock as a way to express Jesus's message within their own religious community and project it into a secular world. In Stephens's compelling narrative, the result was a powerful fusion of conservatism and popular culture whose effects are still felt today.

Looks at the reconstructed exhibit of degenerate art censored by the Nazis in 1937

The astonishing, uplifting story of a real-life Indiana Jones and his humanitarian campaign to use education to combat terrorism in the Taliban's backyard Anyone who despairs of the individual's power to change lives has to read the story of Greg Mortenson, a homeless mountaineer who, following a 1993 climb of Pakistan's treacherous K2, was inspired by a chance encounter with impoverished mountain villagers and promised to build them a school. Over the

next decade he built fifty-five schools—especially for girls—that offer a balanced education in one of the most isolated and dangerous regions on earth. As it chronicles Mortenson's quest, which has brought him into conflict with both enraged Islamists and uncomprehending Americans, Three Cups of Tea combines adventure with a celebration of the humanitarian spirit.

This second edition of Historical Dictionary of Japanese Business contains a chronology, an introduction, appendixes, and an extensive bibliography. The dictionary section has over 800 cross-referenced entries on important personalities, Japanese businesses, politics, and economy,. This book is an excellent access point for students, researchers, and anyone wanting to know more about Japanese Business.

With fuel costs and parking charges it's no wonder the consumer is looking for less expensive forms of travel. This book is aimed at the rider who wants to do his or her own basic scooter maintenance and servicing without the need for in-depth mechanical knowledge, or a technical manual. It covers areas such as oil, brakes, tyres, transmission, electrics, etc, allowing the owner to address the most regularly serviced items without forking out for additional costs. Illustrated with full colour photographs throughout, and featuring clear, easy-to-follow instructions, this book is a must-have for scooter users.

Thinking through Digital Media: Transnational Environments and Locative Places speculates on animation, documentary, experimental, interactive, and narrative media that probe human-machine performances, virtual migrations, global warming, structural inequality, and critical cartographies across Brazil, Canada, China, India, USA, and elsewhere.

This book is about the struggles of enslaved Africans in the Americas who achieved freedom through flight and the establishment of Maroon communities in the face of overwhelming military odds on the part of the slaveholders.

Bethel House, located in a small fishing village in northern Japan, was founded in 1984 as an intentional community for people with schizophrenia and other psychiatric disorders. Using a unique, community approach to psychosocial recovery, Bethel House focuses as much on social integration as on therapeutic work. As a centerpiece of this approach, Bethel House started its own businesses in order to create employment and socialization opportunities for its residents and to change public attitudes toward the mentally ill, but also quite unintentionally provided a significant boost to the distressed local economy. Through its work programs, communal living, and close relationship between hospital and town, Bethel has been remarkably successful in carefully reintegrating its members into Japanese society. It has become known as a model alternative to long-term institutionalization. In A Disability of the Soul, Karen Nakamura explores how the members of this unique community struggle with their lives, their illnesses, and the meaning of community. Told through engaging historical narrative, insightful ethnographic vignettes, and compelling life stories, her account of Bethel House depicts its achievements and setbacks, its promises and limitations. A Disability of the Soul is a sensitive and multidimensional portrait of what it means to live with mental illness in contemporary Japan.

Why do so many evangelicals follow leaders with dubious credentials when they have other options in their own faith? Exploring intellectual authority within evangelicalism, the authors reveal how the concept of anointing—being chosen by God to speak for him—established a conservative evangelical leadership isolated from secular arts and sciences.

Audible Geographies in Latin America examines the audibility of place as a racialized phenomenon. It argues that place is not just a geographical or political notion, but also a sensorial one, shaped by the specific profile of the senses engaged through different media. Through a series of cases, the book examines racialized listening criteria and practices in the formation of ideas about place at exemplary moments between the 1890s and the 1960s. Through a discussion of Louis Moreau Gottschalk's last concerts in Rio de Janeiro, and a contemporary sound installation involving telegraphs by Otávio Schipper and Sérgio Krakowski, Chapter 1 proposes a link between a sensorial economy and a political economy for which the racialized and commodified body serves as an essential feature of its operation. Chapter 2 analyzes resonance as a racialized concept through an examination of phonograph demonstrations in Rio de Janeiro and research on dancing manias and hypnosis in Salvador da Bahia in the 1890s. Chapter 3 studies voice and speech as racialized movements, informed by criminology and the proscriptive norms defining "white" Spanish in Cuba. Chapter 4 unpacks conflicting listening criteria for an optics of blackness in "national" sounds, developed according to a gendered set of premises that moved freely between diaspora and empire, national territory and the fraught politics of recorded versus performed music in the early 1930s. Chapter 5, in the context of Cuban Revolutionary cinema of the 1960s, explores the different facets of noise—both as a racialized and socially relevant sense of sound and as a feature and consequence of different reproduction and transmission technologies. Overall, the book argues that these and related instances reveal how sound and listening have played more prominent roles than previously acknowledged in place-making in the specific multi-ethnic, colonial contexts characterized by diasporic populations in Latin America and the Caribbean.

The origin of life is one of the biggest unsolved scientific questions. This book deals with the formation and first steps of the chemical evolution of nucleic acids, including the

chemical roots behind the origin of their components from the simplest sources in a geochemical context. Chemical evolution encompasses the chemical processes and interactions conducive to self-assembly and supramolecular organization, leading to an increase of complexity and the emergence of life. The book starts with a personal account of the pioneering work of Stanley Miller and Jeffrey Bada on the Chemistry of Origins of Life and how the development of organic chemistry beginning in the 19th century led to the emergence of the field of prebiotic chemistry, situated at the frontier between organic, geo- and biochemistry. It then continues reviewing in tutorial manner current central topics regarding the organization of nucleic acids: the origin of nucleobases and nucleosides, their phosphorylation and polymerization and ultimately, their self-assembly and supramolecular organization at the inception of life.

Between the 1920s and the 1940s, 10,000 traditionalist Mennonites emigrated from western Canada to isolated rural sections of Northern Mexico and the Paraguayan Chaco; over the course of the twentieth century, they became increasingly scattered through secondary migrations to East Paraguay, British Honduras, Bolivia, and elsewhere in Latin America. Despite this dispersion, these Canadian-descendant Mennonites, who now number around 250,000, developed a rich transnational culture over the years, resisting allegiance to any one nation and cultivating a strong sense of common peoplehood based on a history of migration, nonviolence, and distinct language and dress. Village among Nations recuperates a missing chapter of Canadian history: the story of these Mennonites who emigrated from Canada for cultural reasons, but then in later generations “returned” in large numbers for economic and social security. Royden Loewen analyzes a wide variety of texts, by men and women – letters, memoirs, reflections on family debates on land settlement, exchanges with curious outsiders, and deliberations on issues of citizenship. They relate the untold experience of this uniquely transnational, ethno-religious community.

In Thought Crime Max M. Ward explores the Japanese state's efforts to suppress political radicalism in the 1920s and 1930s. Ward traces the evolution of an antiradical law called the Peace Preservation Law, from its initial application to suppress communism and anticolonial nationalism—what authorities deemed thought crime—to its expansion into an elaborate system to reform and ideologically convert thousands of thought criminals throughout the Japanese Empire. To enforce the law, the government enlisted a number of nonstate actors, who included monks, family members, and community leaders. Throughout, Ward illuminates the complex processes through which the law articulated imperial ideology and how this ideology was transformed and disseminated through the law's application over its twenty-year history. In so doing, he shows how the Peace Preservation Law provides a window into understanding how modern states develop ideological apparatuses to subject their respective populations.

All common engine, chassis and electrical systems fully explained and illustrated. Topics covered include engine cycles and layouts, carburetors and fuel injection, ignition systems, clutches, gearbox, engine lubrication and cooling, wheels, tires, braking systems, suspension, steering, handling, design and electrical systems.

ROAD & MOTOR VEHICLES: GENERAL INTEREST. AUSTRALIAN. Going straight to the heart of what it means to be Australian, this book is a must-have addition to any Ford or Holden lover's bookshelf. Never before has this nation-dividing topic been faced head-on, and written about in such a detailed and humorous way.

In *Wonder Shows*, Fred Nadis offers a colorful history of these traveling magicians, inventors, popular science lecturers, and other presenters of “miracle science” who revealed science and technology to the public in awe-inspiring fashion. The book provides an innovative synthesis of the history of performance with a wider study of culture, science, and religion from the antebellum period to the present.

Japan's jazz community—both musicians and audience—has been begrudgingly recognized in the United States for its talent, knowledge, and level of appreciation. Underpinning this tentative admiration, however, has been a tacit agreement that, for cultural reasons, Japanese jazz “can't swing.” In *Blue Nippon* E. Taylor Atkins shows how, strangely, Japan's own attitude toward jazz is founded on this same ambivalence about its authenticity. Engagingly told through the voices of many musicians, *Blue Nippon* explores the true and legitimate nature of Japanese jazz. Atkins peers into 1920s dancehalls to examine the Japanese Jazz Age and reveal the origins of urban modernism with its new set of social mores, gender relations, and consumer practices. He shows how the interwar jazz period then became a troubling symbol of Japan's intimacy with the West—but how, even during the Pacific war, the roots of jazz had taken hold too deeply for the “total jazz ban” that some nationalists desired. While the allied occupation was a setback in the search for an indigenous jazz sound, Japanese musicians again sought American validation. Atkins closes out his cultural history with an examination of the contemporary jazz scene that rose up out of Japan's spectacular economic prominence in the 1960s and 1970s but then leveled off by the 1990s, as tensions over authenticity and identity persisted. With its depiction of jazz as a transforming global

phenomenon, *Blue Nippon* will make enjoyable reading not only for jazz fans worldwide but also for ethnomusicologists, and students of cultural studies, Asian studies, and modernism.

This encyclopedia examines individual films and the careers of individual film makers, it also provides overview articles of national and regional documentary film history. It explains concepts and themes in the study of documentary film, the techniques used in making films, and the institutions that support their production.

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Why are so many students intellectually disengaged? Mark Carnes says it is because students are so deeply absorbed in competitive social play. He shows how month-long role-immersion games in the curriculum can channel those competitive impulses into transformative learning experiences, and how bricks-and-mortar colleges can set young minds on fire.

David Rowell is a professional journalist and an impassioned amateur musician. He's spent decades behind a drum kit, pondering the musical relationship between equipment and emotion. In *Wherever the Sound Takes You*, he explores the essence of music's meaning with a vast spectrum of players, trying to understand their connection to their chosen instrument, what they've put themselves through for their music, and what they feel when they play. This wide-ranging and openhearted book blossoms outward from there. Rowell visits clubs, concert halls, street corners, and open mics, traveling from the Rock and Roll Hall of Fame in Cleveland to a

death metal festival in Maryland, with stops along the way in the Swiss Alps and Appalachia. His keen reportorial eye treats us to in-depth portraits of musicians from platinum-selling legend Peter Frampton to a devout Christian who spends his days alone in a storage unit bashing away on one of the largest drum sets in the world. Rowell illuminates the feelings that both spur music's creation and emerge from its performance, as well as the physical instruments that enables their expression. With an uncommon sensitivity and grace, he charts the pleasure and pain of musicians consumed with what they do—as all of us listen in.

This book sets out to uncover the origins of the idea of a European electricity network. It explores historically the roots of a transnational European system, showing how engineers came to think in terms of "Europe" already in the 1920s, and how this ideas continued to influence network-building in later decades. Covering the period between 1918 and 2001, the book provides a detailed analysis of ideas on, and the building of, an European electricity system.

The cultural historian and author of *Atomic Spaces* offers a comprehensive account of the Baby Boomer years—from the atomic age to the virtual age. Born under the shadow of the atomic bomb, with little security but the cold comfort of duck-and-cover drills, the postwar generations lived through—and led—some of the most momentous changes in all of American history. In this new cultural history, Peter Bacon Hales explores those decades through a succession of resonant moments, spaces, and artifacts of everyday life. Finding unexpected connections, he traces the intertwined undercurrents of promise and peril. From newsreels of the first atomic bomb tests to the invention of a new ideal American life in Levittown; from the teen pop music of the Brill Building and the Beach Boys to Bob Dylan's canny transformations; from the painful failures of communes to the breathtaking utopian potential of the digital age, Hales reveals a nation in transition as a new generation began to make its mark on the world it was inheriting. *Outside the Gates of Eden* is the most comprehensive account yet of the baby boomers, their parents, and their children, as seen through the places they built, the music and movies and shows they loved, and the battles they fought to define their nation, their culture, and their place in what remains a fragile and dangerous world. With more than 250 images, new information on international

cinema—especially Polish, Chinese, Russian, Canadian, and Iranian filmmakers—an expanded section on African-American filmmakers, updated discussions of new works by major American directors, and a new section on the rise of comic book movies and computer generated special effects, this is the most up to date resource for film history courses in the twenty-first century.

Visualization is the graphic presentation of data -- portrayals meant to reveal complex information at a glance. Think of the familiar map of the New York City subway system, or a diagram of the human brain. Successful visualizations are beautiful not only for their aesthetic design, but also for elegant layers of detail that efficiently generate insight and new understanding. This book examines the methods of two dozen visualization experts who approach their projects from a variety of perspectives -- as artists, designers, commentators, scientists, analysts, statisticians, and more. Together they demonstrate how visualization can help us make sense of the world. Explore the importance of storytelling with a simple visualization exercise Learn how color conveys information that our brains recognize before we're fully aware of it Discover how the books we buy and the people we associate with reveal clues to our deeper selves Recognize a method to the madness of air travel with a visualization of civilian air traffic Find out how researchers investigate unknown phenomena, from initial sketches to published papers Contributors include: Nick Bilton, Michael E. Driscoll, Jonathan Feinberg, Danyel Fisher, Jessica Hagy, Gregor Hochmuth, Todd Holloway, Noah Iliinsky, Eddie Jabbour, Valdean Klump, Aaron Koblin, Robert Kosara, Valdis Krebs, JoAnn Kuchera-Morin et al., Andrew Odewahn, Adam Perer, Anders Persson, Maximilian

Schich, Matthias Shapiro, Julie Steele, Moritz Stefaner, Jer Thorp, Fernanda Viegas, Martin Wattenberg, and Michael Young. Among the most exciting developments in the study of Japanese religion over the past two decades has been the discovery of tens of thousands of ritual vessels, implements, and scapegoat dolls (hitogata) from the Nara (710–784) and early Heian (794–1185) periods. Because inscriptions on many of the items are clearly derived from Chinese rites of spirit pacification, it is now evident that previous scholarship has mischaracterized the role of Buddhism in early Japanese religion. Weaving and Binding makes a compelling argument that both the Japanese royal system and the Japanese Buddhist tradition owe much to continental rituals centered on the manipulation of yin and yang, animal sacrifice, and spirit quelling. Building on these recent archaeological discoveries, Michael Como charts an epochal transformation in the religious culture of the Japanese islands, tracing the transmission and development of fundamental paradigms of religious practice to immigrant lineages and deities from the Korean peninsula. In addition to archaeological materials, Como makes extensive use of a wide range of textual sources from across Asia, including court chronicles, poetry collections, gazetteers, temple records, and divinatory texts. As he investigates the influence of myths, legends, and rites of the ancient Chinese festival calendar on religious practice across the Japanese islands, Como shows how the ability of immigrant lineages to propitiate hostile deities led to the creation of elaborate networks of temple–shrine complexes that shaped later sectarian Shinto as well as popular understandings of the relationship between the buddhas and the gods of Japan. For much of the book, this process is examined through rites and legends from the Chinese calendar that were related to weaving, sericulture, and medicine–technologies that to a large degree were controlled by lineages with roots in the Korean peninsula and that claimed female deities and weaving maidens as founding ancestors. Como’s examination of a series of ancient Japanese legends of female immortals, weaving maidens, and shamanesses reveals that female deities played a key role in the moving of technologies and ritual practices from peripheral regions in Kyushu and elsewhere into central Japan and the heart of the imperial cult. As a result, some of the most important building blocks of the purportedly native Shinto tradition were to a remarkable degree shaped by the ancestral cults of immigrant lineages and popular Korean and Chinese religious practices. This is a provocative and innovative work that upsets the standard interpretation of early historical religion in Japan, revealing a complex picture of continental cultic practice both

at court and in the countryside.

"The book expands the discussion in relation to larger constructions of the inner and cosmological self. Unlike the social self, which views itself in relation to the "other," the inner layer involves a reflexivity in which self communicates with self. While the social self engages in dialogue or triologue, the inner self communicates through monologue or soliloquy. The cosmological layer, which centers around transcendental beliefs and fantasies, is examined and the analysis supplemented with comments on aesthetics. Throughout, Lebra applies her methodology to dozens of Japanese examples and makes relevant comparisons with North American culture and notions of self. Finally, she provides an analysis of critiques of Nihonjinron to reinforce the relevancy of Japanese studies." "This volume will prove highly instructive to specialists and non-specialists of Japanese studies in a range of disciplines, including anthropology, sociology, and social psychology."--BOOK JACKET.
