This clinical pocket manual - based on Lippincott's Manual of Nursing Practice - covers the four main areas of nursing: medical-surgical, maternal-newborn, paediatrics and psychiatric. Features include an A-to-Z outline format of diseases and disorders; alerts highlighting critical information; an updated collaborative management section; and nursing interventions throughout. The volume also includes added features on additional disorders; a listing of nursing diagnoses with references from each disorder; a table of common lab tests; a section on problems of the newborn; more graphics; and alternative and psychosocial interventions. Designed for quick, easy point-of-care reference, this spiralbound pocket guide covers every aspect of pediatric nursing in a concise format that is packed with bulleted facts, tables, and illustrations. Five tabbed, distinctively colored sections cover Disorders, Diagnostic Tests, Treatments, Procedures, and Clinical Tools such as growth and development assessment parameters, developmental milestones, drug calculations, infusion therapy guidelines, immunization schedules, and weight and temperature conversions. Topics in each section are arranged alphabetically and follow a consistent format. Recurring icons highlight key points such as life-threatening disorders, interdisciplinary care, patient teaching topics, and color illustrations of pathophysiology.

Do your students ever struggle to grasp what exactly constitutes evidence or struggle to see how it applies to practice? Would you like them to feel more confident about critiquing evidence? The need for an evidence base for nursing practice is widely accepted. However, what constitutes evidence and how nurses might apply it to practice is not always clear. This book guides nursing students through the process of identifying, appraising and applying evidence in nursing practice. It explores a wide range differing sources of evidence and knowledge, and helps students to develop key skills of critiquing research and using evidence in clinical decision making.

This textbook for nursing assistants will prepare students not only to function in the traditional nursing assistant role in nursing homes, hospitals, and home health, but also will prepare students to advance their careers. A nursing assistant student who uses this text will have a firm foundation by which to transition to an LPN and ultimately an RN role. The text offers a compelling art program, a direct, conversational writing style, and an emphasis on professionalism and humanism. A back-of-book CD-ROM includes an audio glossary.

Clinical material is organized by body system, with each chapter providing fully illustrated anatomy and physiology, assessment techniques, diagnostic test data, nursing diagnoses with sample plans of care, information on major disorders, patient-teaching guidelines, treatments, and related patient care. This edition provides updates on more than 1,500 disorders, tests, procedures, and treatments, including information on cardiovascular drugs, AIDS and hypertension classifications, peptic ulcers, and CPR guidelines. Nurses find more detailed information on drugs and professional issues, an added chapter on documentation, and an expanded chapter on the nursing process. Contributors include renowned nurse educators, researchers, and practitioners.
