Chopin's Piano begins in November 1838, when George Sand, her children and Frederick Chopin took a boat to Majorca for the winter. It describes their circumstances there, and how Chopin completed one of the most revolutionary works in the history of music - his Preludes - on 'a small Mallorquin piano' which he picked up when they arrived and carted up to the monastery in the mountains where he and Sand lodged. Kildea traces the history of the Preludes, their pianists, their interpretations, and the history of the Mallorquin piano itself, to find an unexpected path through the history of romantic music - via Wanda Landowska in Berlin in 1913, Paris in 1940-41 when the Nazis seized the piano, down to the end of romantic music. It is an astonishing narrative and detective story, an unclassifiable and thrilling book, which explores in an original way the changing meaning of music through time.

"Listen to This is designed to connect students' interest in the music on their own playlists with great music from throughout history and all over the world. It is based on the idea that all music is built on a combination of a few basic elements – melody, dynamics, rhythm, harmony, texture, timbre, form, and word-music relationships – and if students listen for those elements they can better understand how a piece of music works, no matter how unfamiliar it may seem at first. This elements-centered approach provides a strong foundation for learning about, and enjoying, many new musical styles. The Fourth Edition includes expanded coverage of timbre as well as new chapters on additional musical works. Included in this package, MyLab™ Music for the Music Appreciation course is an online homework, tutorial, and assessment program designed to work with this text to engage students and improve results. MyLab Music also gives students access to the music and listening guides that accompany the text. Please note: this version of MyLab Music does not include an eText. Listen to This , Fourth Edition is also available via Revel™ , an interactive digital learning environment that replaces the print textbook, enabling students to read, practice, and study in one continuous experience. Revel is ideal for courses where student engagement and mobile access are important."--Publisher's description.
