Following the
recommendation of
the International

magnetic field
measured in
geophysical work is
labelled here as flux
density (tesla).

Consequently, the

symbols H, Z and T commonly used in geomagnetic work should stand for flux density. In the Maxwellian theory of electromagnetism the symbol H stands, by convention, for a magnetizing force ($A\ m^{-1}$) and a discerning reader will at once sense a source of

confusion. This source
of confusion is
avoided in the present
edition by B , B and B
instead of H, Z and T.
The employing the

corresponding
magnetizing forces of
the earth's field. I hope
this notation will gain
general acceptance
