Bestselling author Richard Koch shows managers how to apply the 80/20 Principle to achieve exceptional results at work -- without stress or long hours. In his bestselling book The 80/20 Principle , Richard Koch showed readers how to put the 80/20 Principle -- the idea that 80 percent of results come from just 20 percent of effort -- into practice in their personal lives. Now in The 80/20 Manager, he demonstrates how to apply the principle to management. An 80/20 manager learns to focus only on the issues that really matter, achieving exceptional results, and feeling successful everyday while working less hard in fewer hours. A large number of managers -- especially in these difficult times -- feel completely overwhelmed. Their inboxes are overflowing and they constantly struggle to finish their to-do lists, leaving little time for the things that really matter. The 80/20 Manager shows a new way to look at management -- and at life -- to enjoy work and build a successful and fulfilling career.

Maid in China is the first systematic, book-length investigation of internal rural migration in post-Mao China focused on the day-to-day production and consumption of popular media. Taking the rural maid in the urban home as its point of departure, the book weaves together three years of engaged ethnographic research in Beijing and Shanghai with critical analyses of a diverse array of popular media, and follows three lines of inquiry: media and cultural production, consumption practices, and everyday politics. It unravels some of the myriad ways in which the subaltern figure of the domestic worker comes to be inscribed with the cultural politics of boundaries that entrench a host of inequalities—between rich and poor, male and female, rural and urban. Wanning Sun explores a number of paradoxes that the domestic worker lives out on a daily basis: her ubiquitous invisibility, her enduring transience, and her status as an intimate stranger. Collectively, these paradoxes afford her a unique window onto the spaces and practices of the modern Chinese city. This intimate stranger's epistemological status makes her an unauthorized yet authoritative witness of urban residents' social lives, offering a revealing lens through which to examine both the formation of new social relations in post-reform urban China, and the new social uses of space—both domestic and public—engendered by these relations.

In 2003, when a mysterious ancient chamber was unearthed beneath the Romanian Sphinx in the Bucegi Mountains, it became a state secret of the highest level for Romania and their new partner, the United States, whose advanced technology enabled the discovery to take place. The primary custodial agency of this remarkable chamber full of holographic technology is Department Zero, a secret service unit that answers only to the Romanian president. Acting as some sort of cosmic buoy, it has an energy signature connecting both to Jupiter's moon, Europa, and an area of Transylvania where the remains of an ancient civilization were uncovered in 1990 amidst vast tunnels of solid gold. Long ago classified as the top state secret of Romania, this location becomes the center of intrigue in and around Department Zero. Although not actually penetrating the underground area itself, Peter Moon visits the general area and determines that this ancient civilization is still very much alive and active.
